

Indias Biotechnology Sector How India is Reinventing the Future

Description:

India has emerged as one of the top biotech destinations in the world, with the industry expected to register double-digit growth in the coming years. The biotech industry contributed \$12 billion to India's GDP in 2016 and is set to reach \$36 billion by 2025, employing over 1 million people. Discover more about this crucial sector of India's healthcare industry.
