Herbal Cosmetics & Ayurvedic Medicines(EOU)

Since Vedic period India has rich and varied flora of herbal/medicinal plants. It is due to its unique variety of geographical climatic conditions. Now a day's herbal cosmetics and ayurvedic medicines are gaining very fast

popularity not only in India but all over world. So, there is a very good scope for diversification into this field as well as for new entrants. This book contains formulae, processes, testing methods along with list of machinery manufacturers, raw material suppliers, importers and exporters etc. The book will be very useful for prospective entre-preneurs, technocrats, libraries etc.

Water and Air Effluents Treatment Handbook

Water quality analytical techniques are considered in the context of EEC directives on the quality of the aquatic control of all effluents is entering it. The principal methods of water analysis are reviewed and the use in leachate analysis indicated in view of destructive and hazardous role of pollution, it become necessary that the very nature of atmosphere, the various air effluent are present there to save the environment from the harmful effect. This book is an effort to put together the various

options available to meet the water and air effluent available for the environmental protection. The book presents a concise but through an overview of state of technology for water and air effluent treatment. The water and air effluent treatments are organized into chapters by broad problem area, treatment of industrial effluent, industrial waste management, etc. This will be helpful to technocrats, consultants, educators, architects, industry executive, students and others concerned with saving environment problem.

The Complete Book on Emulsifiers with Uses, Formulae and Processes

Emulsifier is an organic compound that encompasses in the same molecule two dissimilar structural groups e.g. a water soluble and a water insoluble moiety. The composition, solubility properties, location and relative sizes of these dissimilar groups in relation to the over all molecular configuration determine the

surface activity of a compound. Emulsifiers are classified on the basis of their hydrophilic or solubilizing groups in to four categories – anionics, non-ionics, cationics, and amphoteric. The present book contains manu-facturing processes of various types of emulsifiers which have applications in different industries. This is a book for scientists, technologists, entrepreneurs and ingredients suppliers.

Potato and Potato Products Cultivation, Seed Production, Manuring, Harvesting, Organic Farming, Storage and Processing

Potato ranks fourth position in the world after wheat, rice and Maize as non-cereal food crop. It is used in many ways

like vegetable, potato wafers/ chips, powder, finger chips etc. Potato tubers constitute a highly nutritious food. It provides carbohydrates, vitamin C, minerals, high quality protein and dietary fiber. The present book covers complete details of potato cultivation and processing in proper manner. This is very useful book for agriculture universities, students, technocrats and entrepreneurs.

Surface Coating Technology Handbook

Surface Coating is in use since long back is rapidly increasing with the development of civilization. There has been considerable impact in this field. We have completely replaced costly petroleum solvents with water. So we get cheaper finished products with no evaporation loss and fire hazards. This way surface coating industry is eco-friendly. This is an effort to put together the various options available for surface coating. The book presents a concise,

but through an overview of state of technology for surface coating. This is organized into different chapters like principal of film formation, chemistry and properties of drying and other oils, processing of oil and resin, organic pigment, solvents, plasticizer, surface active agent, surface preparations etc. This book will be helpful to technocrats; new entrepreneurs, research scholars and others concerned to this field.

Soaps, Detergents and Disinfectants Technology Handbook

It has been said that amount of soap and detergent consumed in a country is a reliable measure of its civilizations. There was a time when these products were luxury; now it is a necessity. A disinfectant or agent that frees from infection is ordinarily a chemical agent which kills disease germs or other

harmful microorganisms and is applied to inanimate objects. The present book contains formulae, processes of different types of soaps, detergents and disinfectants. These products have good demand in domestic as well as in International market. So there is a very good scope for new entrepreneurs to venture into this field. This book is very useful for entrepreneurs, technocrats and for those who want to diversify in to this field.

BOOKS ON FOOD, SPICES, BAKERY, FRUITS, VEGETABLES, POULTRY, DAIRY, CONFECTIONERY, AGRO PRODUCTS/OILS & FATS, FOOD COLOURS, ADDITIVES

The Complete Technology Book On DAIRY & POULTRY INDUSTRIES

(With Farming & Processing) 2nd Revised Edition
Developments in the Dairy and Poultry industries during the last decade have been important enough to be brought out a considerable amount of material on Dairy and Poultry farming and processing of milk and poultry related products. The first book of its kind which cover complete details of dairy poultry farming, processing, how to feed cows, birds in dairy and poultry, kind of diseases and their cure and other information related to farming. ₹1275 US\$125

The Complete Technology Book On SNACK FOODS

2nd Rev. Edn.
There are plenty of marketing niches and slots to be filled in the Snacks Food area. This book attempts to provide the processes for the manufacture of various Snacks food items which has tremendous domestic and export market. ₹1475 US\$150

MODERN TECHNOLOGY OF MILK PROCESSING & DAIRY PRODUCTS

4th Rev. Edn.
The dairy industries in many countries a major contributor to the manufacturing capacity of the food sector, and as more components of milk are utilised in processed food, so this importance is likely to grow. This book is devoted solely to milk and its products. The book deals with processes, formulae, project profiles, details of plant machinery and raw materials with their resources etc. of various dairy products. ₹1475 US\$150

MODERN TECHNOLOGY OF FOOD PROCESSING & AGRO BASED INDUSTRIES

2nd Edn.
The book contains confectionery, bakery, canning and preservation, fruits and vegetable products, Agro based projects with processes, formulae, machinery and raw materials sources etc. ₹1575 US\$150

Hand Book on SPICES

India is one of the leading producers and exporters of spices in the world. This book covers the comprehensive information on cultivation and processing of main spices and condiments of India which play important role in national economies of several spices producing, importing and exporting countries. ₹975 US\$100

Modern Technology of CONFECTIONERY INDUSTRIES

With Formulae & Processes 2nd Rev. Edn.
Confectionery in a broader sense implies the preservation of sweet-meat preparation in the form of candies, caramels, chocolates, processed cocoa products and traditional Indian confections. Special emphasis has been made on describing the various process parameters and equipments used with the help of process diagrams wherever necessary. Apart from these it also

contains details of cooking techniques, formulae, processes, the incorporation of flavours and essences, permitted colours used, quality control aspects alongwith sources of plant, machinery and raw material. ₹600 US\$100

RABBIT, GOAT, SHEEP, POULTRY, FISH AND PIG FARMING WITH FEED TECHNOLOGY

Livestock and poultry in Indian tropics and subtropics play a critical role in agricultural economy by providing milk, wool, meat, eggs and draft power and manure. They are living banks for farmers and provide flexible reserves during period of economic stress and buffer against crop failure. Rabbit farming is no doubt very profitable wing to their short generation interval and their rapid prolificacy. The large demand for animal protein and fiber, the future for sheep meat and wool seems to be assured. Sheep rearing is the major source of livelihood to small and marginal farmers and landless labourers in hilly areas, arid and semi-arid region of India. Goat was believed to be the earliest ruminant, among livestock, species, to be domesticated by man in around 7600 B.C, probably, due to its multipurpose utility to the human beings. Fish is a good source of animal proteins, Man has realized its importance from the very inception of the evolution of the human race. ₹1100 US\$125

The Complete Technology Book on Cocoa, Chocolates, Ice cream and other Milk Products

Cocoa, Chocolate and Ice cream are the products which has a good nutritious value and relatively inexpensive food. Cocoa butter is used in chocolate and to cover other confectionery products. Now a days chocolate and ice reams are gaining good popularity among the society all over the world. The present book contains formulae, processes and other relevant details related to manufacture of Cocoa products, chocolates, ice cream and other milk products. An attempt has been made to bring in to focus the significant aspect of cocoa products, dairy products manufacturing. ₹1275 US\$125

FOOD PACKAGING TECHNOLOGY HANDBOOK

2nd Rev. Edn.
This book gives comprehensive account of food packaging, which is the most important part to preserve the food for a long time. ₹1475 US\$150

THE COMPLETE TECHNOLOGY BOOK ON PROCESSING, DEHYDRATION, PRESERVATION OF FRUITS & VEGETABLES

A Comprehensive book which deal with Processing, Dehydration, Canning, Preservation of various fruits and vegetables. Information on quality control and other parameters has been discussed in this book which is necessary for this type of project. Each chapter gives theoretical as well practical information to understand the basic principles and methodology. ₹1575 US\$150

THE COMPLETE TECHNOLOGY BOOK ON BAKERY PRODUCTS

2nd Edn.
Bakery products are gaining a new dimension in modern times owing to their versatility in day to day life. Being highly demandable products, their popularity is increasing tremendously. The book elucidates full procedure to be adopted for making various bakery products, details of raw materials, plants and machinery required along with their suppliers, formulae, processes etc. ₹1100 US\$125

Modern Technology on Food Preservation

The people in the world required trillions pounds of food, one mouthful at a time, during the period from one food harvest to the next. All of man's foods are perishable commodities, they begin to deteriorate shortly after harvest, gather or slaughter. The purpose of this book is to present the elements of the technology of food preservation. It deals with the products prepared from various fruits and vegetables commercially as well as on home scale. Relevant information on enzymes, colours, additives, flavours, adulteration, etc., has been given. ₹1275 US\$125

Hand Book on FRUITS, VEGETABLES & FOOD PROCESSING With Canning & Preservation

3rd Rev. Edn.
Natural foods such as fruits and vegetables are among the most important foods of mankind as they are not only nutritive but are also indispensable of the maintenance of the health. The present book covers the processing of various types of fruits, vegetables and other food products. Apart from this Canning and Preservation processes are also included in this book with other comprehensive details. ₹1475 US\$150

Modern Technology of OILS, FATS & ITS DERIVATIVES

2nd Rev. Edn.
The book contains the manufacturing processes and other related informations of important Oils, Fats and their derivatives. ₹1875 US\$150

Modern Technology of AGRO PROCESSING AND AGRICULTURAL WASTE PRODUCTS

The book deals with the processing of different products manufactured from agro crops. It also contains the number of products made from agricultural waste with their project profiles, requirements of plant, machinery and raw materials and addresses of their suppliers. ₹975 US\$100

FOOD COLOURS, FLAVOURS AND ADDITIVES TECHNOLOGY Handbook

The people in earth require about 3.4 billion pounds of food, one mouthful at a time. All of man's food are perishable. They begin to deteriorate shortly after harvest. This also loose the restrictive value of foods. In this twenty first century, mankind has developed a technology to retain the original value of food by adding additives, flavours and colours, which also increases the taste of food. ₹1000/- US\$100

Food Flavours Technology Hand Book

No Doubt flavour is one of the most important attributes of the food products we eat in our daily life. Man does not eat simply to live but even more so lives to eat. The flavour industry has become a vital element in the growth and success of food and beverage industries worldwide. The present book contains formulae, processes of various flavours applied in food and beverage industries. ₹1075 US\$125

The Complete Technology Book on Flavoured Ice Cream

Ice Cream is a favourite food of millions around the world. It is a frozen mixture of a combination of component of milk, sweeteners, stabilizers, emulsifiers and flavours. Ice cream is a palatable, nutritious and relatively inexpensive food. No other food enjoys so much popularity and has as attractive a form and appeal as ice cream. It is a comprehensive book which covers all the aspects of manufacturing of ice cream in various flavours. ₹975 US\$100

Wheat, Rice, Corn, Oat, Barley and Sorghum Processing Handbook (Cereal Food Technology)

Cereal grains play an important role in meeting the nutrient needs of the human population. Like any food, they are good to excellent sources of some nutrients and low or void in other nutrients. The vitamins content varies from one part of grain to another. The quality of cereal product is determined by a variety of characteristics which may be assigned different significance depending on the desired use or type of product. The present book contains processing of various cereal like wheat, rice, corn, oat, barley and sorghum with latest techniques. ₹975 US\$100

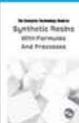

The complete Book on SPICES & CONDIMENTS

(With Cultivation, Processing & Uses) (2nd Rev. Edn.)

The great mystery and beauty of spices is their use, blending and ability to change and enhance the character of food. Spices and condiments have a special significance in various ways in human life because of its specific flavours, taste, and aroma. Spices and condiments play an important role in the national economies of several spice producing, importing and exporting countries. India is one of the major spice producing and exporting countries. The present book contains cultivation, processing and uses of various spices and condiments, which are well known for their multiple uses in every house all over world. ₹2275 US\$200

SYNTHETIC RESINS

The Complete Technology Book on Synthetic Resins With Formulae And Processes

Synthetic Resins are used by lot of industries. Yet until, little emphasis has been placed on the comparative value or functionality of polymeric material as a class. These resins have been classified in separate categories usually in terms of their Chemistry, sources or end uses. The present book contains formulae, processes and other valuable details for various synthetic resins. ₹1150 US\$125

Modern Technology of Synthetic Resins & Their Applications

The book covers manufacturing processes formulae of various types of synthetic resins with their applications. ₹975 US\$100

Synthetic Resins Technology Handbook

Resins are polymeric compounds which are available in nature and are also manufactured by synthetic routes. Some resins are also manufactured by partial modification of natural precursor polymer by chemical. The resins have wide industrial uses like in lacquers, paints, textiles, varnishes, printing inks and cosmetics etc. This book contains formulae, processes and applications of various resins. ₹1100 US\$125

ABOUT US

NPCS marketing Associates of **National Institute of Industrial Research, NIIR** an ISO 9001 : 2008 CERTIFIED COMPANY is a reliable name in industrial world for offering integrated technical consultancy service and also technical collaborations. At NPCS, we provide prudent advice regarding a business when diversification is on the anvil, when an entrepreneur is up against lack of information before starting a project, we strive to provide them with technology evaluation, sourcing and assimilation of detailed project reports, market survey studies and research through our advanced Industrial, Business and Commercial Database.

We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. Over the years, NPCS has become a well-known name in the industrial world for offering integrated technical consultancy service. Due diligence reports are prepared on behalf of the proposed buyers and sellers of the business. We provide the services through comprehensive knowledge of equipment and practices through our excellent team at very economical price.

A large number of our Indian and NRI clients have appreciated our expertise for excellence by giving us report orders which speak volumes about our commitment in providing complete customer satisfaction. We have successfully handled a number of NGO projects. NPCS is manned by a dedicated team of highly qualified and experienced and consultants Engineers, Economist and Technologists from various disciplines. We have undertaken extensive work in identifying new project opportunities sourcing technology and industrial know-how from European, South Asian + USA etc and keeping in step with changing industrial scene and growing needs of entrepreneurs and business houses in India and Abroad.

Guar Gum Powder Using Splits

Guar is also called guaran, is a Galactomannan. It is primarily the ground endosperm of guar beans. The guar seeds are dehusked, milled and screened to obtain the guar gum. It is typically produced as a free flowing, pale, off-white colored, coarse to fine ground powder. Guar gum is water-soluble plant mucilage obtained from the grand endosperms of cyanopsis tetragonoloba, cultivated in Pakistan as livestock feed. The water-soluble portion of the flour (85%) is called 'guaran' and consists of 35% galactose, 63% mannose, probably combined in a polysaccharide 5-7% protein.

Approximately 90% of total Guar produce is used for production of Guar Gum and rest is used for culinary purposes and cattle feed etc. Guar gum, also called guaran, is a galactomannan. Guar gum is produced from the endosperm, which is about 35-42 percent of the guar seed mass, and mainly consists of gum Poly groups of monogalactoses (a type of sugar). Different grades are made based on purity and present viscosity of powers in water. Guar gum has almost 8 times the thickening power as corn starch, and is used in dressings, sauces, milk products, and baking mixes.

India accounts for 80% of the total guar produced in the world and 70% is cultivated in Rajasthan. Pakistan, Sudan and parts of USA are the other major Guar growing countries. 75% of the Guar Gums or their derivatives produced in India are exported mainly to USA and European countries. The consumption pattern of guar seeds is largely

influenced by the demand from the petroleum industry of the U.S. and the oil fields in the Middle East as the derivative products of these seeds are quite useful in the petroleum drilling industries. The U.S. alone constitute to around 70 thousand tonnes of guar and its derivatives demand. Also, in rest of the world, the trend of consumption has increased with time that has led to the introduction of this crop in many countries. Germany & China account for about 24 percent of global consumption together. The export demand from India is around 2 lakh tons of Guar gum and the domestic market is of around 30,000 tons. Thus, it is a good project for entrepreneurs to invest.

dressings the wounds by Doctor and Jauhurs's. It is also used by Tailors for putting pads in Woolen Suits etc. and making Novelties items by artists. Of course the Doctors consume the maximum quantity of Surgical Cotton produced in India. In present much advanced time the numbers of doctors are increasing drastically thereby increasing demand for surgical cotton at very fast rate. It also carried a good potential. Medium staple cottons, Boned was to from cotton Mills or Linters from spinning Mills are used as raw materials for the manufacture of this product. To manufacture surgical cotton anyone of these three materials may be used separately or farley economical blend produce good quality surgical cotton.

The demand of Surgical Absorbent Cotton is directly related with the increase in population and expansion of public health services. The demand for Surgical Absorbent Cotton increases with the increase in population and number of hospitals, dispensaries, nursing homes, health care centers etc. Progressive increase in health amenities offered by Government and coming up of new hospitals and health care centres in private sector even at small towns are contributing to the growth of absorbent cotton industry. Government hospitals and large nursing homes are the largest consumer for cotton wool.

Surgical cotton or absorbent cotton is in great demand all over the world, but with desi cotton — considered ideal raw material for it — being edged out, manufacturers have been banking heavily on regular American cotton. As a whole it is a good project for entrepreneurs for investment.

Hard Gelatin Capsules

Capsules are solid dosage forms in which one or more medicinal and inert ingredients are enclosed in a small shell or container usually made of gelatin. There are two types of capsules, "hard" and "soft". The hard capsule is also called "two piece" as it consists of two pieces in the form of small cylinders closed at one end; the shorter piece is called the "cap" which fits over the open end of the longer piece, called the "body". The soft gelatin capsule is also called as "one piece".

Capsules are available in many sizes to provide dosing flexibility. Unpleasant drug tastes and odors can be masked by the tasteless gelatin shell.

Gelatin is defined as a product obtained by the partial hydrolysis of collagen derived from the skin white connective tissue and bones of animals. Gelatin derived from an acid treated precursor is known as type A and gelatin derived from an alkali treated precursor is known as type B. Gelatin is a protein and in aqueous solution forms a hydrophilic colloid, leading to complex behavior. As a normal constituent of plant and animal tissues, it is essential to their growth. It occurs especially in seeds, the yolk of eggs, the nerves and brain and bone marrow, usually in the form of lecithins or glycerophosphates. It is an essential constituent of bones in the form of calcium phosphate. Bone contains about 58% calcium phosphate plus some calcium carbonate, fat and nitrogenous organic matter.

Hard gelatin capsules are a modern dosage form for medicinal use, stemming from the increased emphasis on pharmacokinetics found in drug development today. This has considerably expanded the range of possible formulations utilizing hard gelatin capsules as a simple dosage form for oral drug delivery. The Indian pharmaceutical industry is the

fourth largest in the world in terms of volume of output and thirteenth in domestic demand. However, the Indian industry, valued at USD 17 bn in represented just over 1% of the global pharmaceutical industry (USD 1700 bn) in value terms. The domestic market is estimated at Rs 680 bn. India has the world's third largest active pharmaceutical ingredients (API) for the industry valued at a little less than USD 2 bn. Top 5 API producers account for approximately 6.5%. The leading APIs are anti-infectives, gastrointestinal, cardiovascular and respiratory drugs. Any entrepreneurs venture into this field will be successful.

available for use. Many companies manufacture packaged intravenous fluids, as well as products which can be mixed with sterile water to prepare a solution for intravenous administration.

Intravenous fluids can be broken into two broad groups. Crystalloids such as saline solutions contain a solution of molecules which can dissolve in water. When crystalloids are administered, they tend to create low osmotic pressure, allowing fluid to move across the blood vessels, and this can be linked with edema. Colloids contain particles which are not soluble in water, and they create high osmotic pressure, attracting fluid into the blood vessels. Blood is an example of a commonly administered intravenous colloid.

I.V. fluid demand is normally linked to the number of hospital beds. Observations show that 18 bottles of I.V. fluids are consumed per bed per month in the country. The demand is estimated to increase at a rate of 9 to 12% per annum. The present demand level is estimated to be around 2200 Lakh bottles per annum. Areas with high population density and average temperatures are major consumption areas of I.V. fluids. Demand is high Uttar Pradesh, Rajasthan, Haryana, Bihar, Madhya Pradesh and West Bengal. North India alone account for one third of

the total demand in the country. So any new entrants can venture in to this industry.

Baby Diaper & Sanitary Napkins

A diaper or nappy is a kind of underwear that allows one to defecate or urinate in a discreet manner. When diapers become soiled, they require changing; this process is often performed by a second person such as a parent or caregiver. Diapers are primarily worn by children who are not yet potty trained or experience bed wetting. However, they can also be used by adults with incontinence or in certain circumstances where access to a toilet is unavailable. These can include the elderly, those with a physical or mental disability, and people working in extreme conditions such as astronauts. It is not uncommon for people to wear diapers under dry

Some disposable diapers include fragrances, lotions or essential oils in order to help mask the scent of a soiled diaper or to protect the skin. Care of disposable diapers is minimal, and primarily consists of keeping them in a dry place before use, with proper disposal in a garbage receptacle upon soiling. Stool is supposed to be deposited in the toilet, but is generally put in the garbage with the rest of the diaper. Starch & Starch Derivatives

(With 4 MW Co-Generation Plant)

Maize starch chemical formula (C₆H₁₀O₅)_n also known as Corn starch or flour is a

fundamental ingredient in most of the packaged food and industrial products; it is extracted from the corn kernel and has a distinctive appearance and feed. Maize starch in natural, modified, pregeletanised and dextrinised forms provides viscosity, texture and other desired properties to all types of food & paper, products from canned chilled frozen to microwaveable goods, dry mixes and extruded snacks. Practically every industry in existence uses starch or its derivatives in one form or another.

Maize is classified into dent, flint, waxy, sweet and pop corn categories. Dent corn also known as field corn, containing both hard and soft starch, becomes indented at maturity. Flint corn having hard, horny, rounded or short and flat kernels; with the soft and starchy endosperm is enclosed by hard outer layer. Both of these varieties are used for industrial purposes. Popcorn has small pointed and rounded kernels with very hard endosperm which on exposure to dry heat popped or evereted by the expulsion of the contained moisture and forming a White starchy mass many times the size of the original kernel. Sweet corn is distinguished by kernels containing a high percentage of sugar in the milk stage and therefore suitable for table use.

Indian maize has white, red, purple, brown or multicolored kernels and is characteristically dent corn. The dent corn is useful for starch processing by wet milling method. The total area under maize cultivation in the world is 139 million hectares with a production of 598 million MT (mMT). USA is the world's largest producer and exporter of maize with an output of 240 mMT from an area of 29 million hectares. Other major producers are China (125 mMT), European Union (39 mMT), Brazil (37 mMT), Mexico (19 mMT), Argentina (14 mMT) and India (11 mMT). Due to demand growth, it is a good project for entrepreneurs to invest.

Crude Rubber Processing

Naturally, rubber is produced by the process of tapping of the plant called Hevea Brasiliensis.

The rubber tree is a native of the Amazon River basin in South America. The ideal rubber growing regions should be 8 degree North of Equator, 10 degree South of Equator, and high temperature, altitude not beyond 400m and high humidity.

The main use of natural rubber is in automobiles.

In developed countries nearly sixty per cent of all rubber consumed is for automobile tyres and tubes. In heavy duty tyres, the major portion of the rubber used is NR. In addition to tyres a modern automobile has more than 300 components made out of rubber.

Many of these are processed from NR. Uses of NR in hoses, footwear, battery boxes, foam mattresses, balloons, toys etc., are well known. In addition to this, NR now finds extensive use in soil stabilization, in vibration absorption and in road making. A variety of NR based engineering products are developed for use in these fields.

Malaysia and China have 1,237 and 932 thousand hectares under rubber respectively. India has around 687 thousand hectares under rubber plantations. As per the Rubber Board, India now occupies the first rank in terms of productivity at 1,819 kg/ha. China being the fastest growing economy of the world is also the world's largest natural rubber consuming country. At 3,603 thousand tonnes it consumes 33% of the total rubber consumed over the world. As a whole it is a good project for entrepreneurs for investment.

Dextrose Powder

Dextrose in food is a simple sugar. It is actually a type of glucose, which is a monosaccharide that is widely found in nature and is used by nearly every living organism as a source of energy at the cellular level. The glucose molecule comes in two molecular forms that are mirror images of one another, and dextrose is one of those forms. Dextrose (or D-Glucose) is a simple hexose monosaccharide sugar. It is so called because it turns the plane of polarization to the right. Entirely derived from corn it is free from all other sugars and starches, proteins, alcohols and heavy metals. It is the natural form of Glucose.

Dextrose is a form of glucose, a monosaccharide, or simple sugar. Glucose is your body's primary fuel, and while your digestive system can break down all

the foods that you eat into glucose, carbohydrates provide the most amount of raw materials for glucose. Glucose molecules can occur in two different shapes, known as stereoisomers, and one of those forms is called dextrorotary glucose. It's also known by the chemical name of dextrose monohydrate, or d-glucose for short. The food industry calls this sugar dextrose.

The demand for dextrin and dextrose is highly influenced by the growth of the manufacturing sectors mainly textiles, glass, printing ink, food, soft drink, tanning, tobacco and the like. The manufacturing sector has been growing by more than 6% in the past few years. Assuming the past trend will continue in the future, an annual average growth rate of 6% is applied to forecast the future demand by taking the current effective demand as a base. So any new entrants can venture in to this industry.

Masala Powder

Spices impart aroma, color and taste to food preparations and sometimes mask undesirable odors. The volatile oils from spices give the aroma and the oleoresins impart the taste. There is a growing interest in the theoretical and practical aspects of the inner biosynthetic mechanisms of the active principles in spices, as well as in the relationship between the biological activity and the chemical structure of these secondary metabolites. The antioxidant properties of herbs and spices are of particular interest in view of the impact of oxidative modification of low-density lipoprotein cholesterol in the development of atherosclerosis.

There are a number of masalas with various ingredients. Garam Masala is commonly used in curries, and curry masalas are also available separately. Biryani Masala, Chat Masala, Pav Bhaji masala, Chicken, Mutton, Fish etc., masalas are now

available in readymade and packed forms. Dry masalas include jeera, cardomom, chilies or pepper, clove, cinnamon, black jeera. rock salt etc. Wet masalas also contain garlic, oil, ginger, etc. Masala is a word that is often used in an Indian kitchen. It literally means a blend of several spices.

India is the largest producer, consumer and exporter of spices, with a 46 per cent share by volume and 23 per cent share by value, in the world market. The Indian spice export basket consists of around 50 spices in whole form and more than 80 products in value added form. However, a few spices and value added forms constitute a major segment of the country's total export earnings. India accounts for 25-30 per cent of world's pepper production, 35 per cent of ginger and about 90 per cent of turmeric production. Among the Indian Federal states, Kerala tops in pepper (96 per cent), Cardamom (53 per cent), Ginger (25 per cent) production in the country. Andhra Pradesh leads in Chilly and Turmeric production in the country with 49 per cent and 57 per cent. In coriander, cumin and fenugreek production in the country, Rajasthan emerges as the largest producer with 63 per cent, 56 per cent and 87 per cent of domestic production. As a whole establishing Masala Powder Unit is one of the project which has good prospect for the entrepreneurs to invest.

Mosquito Coils (Automatic Plant)

Mosquitoes need to be exterminated using with right tools and little bit of effort. Mosquito coil is mosquito-repelling incense, usually shaped into a spiral, and typically made from a dried paste of pyrethrum powder. The coil is usually held at the center of the spiral, suspending it in the air, or wedged by two pieces of fireproof nettings to allow continuous smoldering. Burning usually begins at the outer end of the spiral and progresses slowly toward the centre of the spiral, producing a mosquito-repellent smoke.

Insecticides are used either for killing or controlling of harmful insects. The insecticides which are applied for repelling insects are termed as

EMERGING INVESTMENT OPPORTUNITY IN BURGEONING INDIAN MILK PROCESSING & DAIRY PRODUCTS SECTOR

(WHY TO INVEST, BUSINESS PROSPECTS, CORE PROJECT FINANCIALS, POTENTIAL BUYERS, MARKET SIZE & INDUSTRY ANALYSIS)

Price : 28,090.00 US\$ 500.00

Niir Project Consultancy Services has recently released a report titled 'Emerging Investment Opportunity in Burgeoning Indian Milk Processing & Dairy Products Sector (Why to Invest, Business Prospects, Core Project Financials, Potential Buyers, Market Size & Industry Analysis)' which aims to help an entrepreneur make sound and informed business decision before deploying his valuable resources. The report encapsulates all the vital information which can help an entrepreneur precisely evaluate the market potential and business prospects of dairy products sector.

MARKET RESEARCH REPORT ON FUTURE OF ONLINE RETAILING IN INDIA

(INDUSTRY GROWTH DRIVERS, STATISTICS, TRENDS, MARKET SIZE, ANALYSIS & FORECASTS UPTO 2017)

Price: Rs. 30,338.00 US\$ 500.00

The research report titled 'Market Research Report on Future of Online Retailing in India (Industry Growth Drivers, Statistics, Trends, Market Size, Analysis & Forecasts upto 2017)' released by Niir Project Consultancy Services provides a profound analysis of the online retailing market scenario in India. The report aims at analyzing the present as well as future prospects of the industry with respect to changes in the Indian market dynamics. It covers data points like overview & segmentation of the industry, growth drivers, trends that are emerging in the sector, demand assessment and porter 5 force analysis of the online retailing industry in India.

To establish a better understanding of market potential of the evolved dairy products in India, Niir Project Consultancy Services has released a new study titled 'Market Research Report on Milk Processing & Dairy Products in India (Butter, Yogurt, UHT Milk, Cheese, Ice Cream, Ghee & Other Products)- Market Prospects, Present Scenario, Growth Drivers, Demand-Supply Statistics, Industry Size, Sector Outlook, Analysis & Forecasts upto 2017'. The report identifies the current & future market prospects of dairy products, the value drivers that will trigger the growth, opportunities & challenges faced by the sector coupled with government initiatives and porters 5 forces analysis of the industry. It helps you classify dairy industry on the basis of its business attractiveness and investment potential which can prove to be a vital link in prudent business decision making. The report provides a comprehensive analysis of the dairy products sector along with the financial details of dairy products companies.

“Repellent”. Mosquito is one of the most harmful insects for mankind. To destroy them many preparations are available in the market in various recipes like pest killer spray, soap, oil, powder, repellent etc. Out of these, mosquito repellent is the most popular as it has germicidal and disinfectant properties and is able to repel mosquitoes and is convenient to use.

At present there is excellent scope for its manufacture. It is therefore advisable to carry out a little research work in formulating, before the marketing is done. The competition in this line is very less and its scope of consumption is large have in comparison. Today, Mortein’s 11 per cent share makes it the second largest brand in the Rs. 350 crore pest control market. Godrej Hi-Care, with its Good Knight, Hit and Jet brands, is leading with a collective 45 per cent share. But according to RCI, the leader might see a battle among its own brands (say, Good Knight versus Jet in mats), from which it could benefit. On the other hand, Sara Lee’s considerable stake in Godrej Hi-Care has put RCI on alert. Meanwhile, Baygon continues to be strong in liquids, though low key on advertising. Due to demand growth, it is a good project for entrepreneurs to invest.

Pickles (Various Types)

Pickle is a general term used for fruits or vegetables preserved in vinegar or brine, usually with spices or sugar or both. Pickle producing businesses are engaged in producing pickle in different varieties. Natural fruit and vegetable items are used as raw material for producing various types of pickles i.e. mango, beet, cabbage, cauliflower etc. Pickles are considered the permanent part of the food table all over the Sub-Continent and its demand is rising after its production on commercial scale. Sub-continental spices, preserved foods and traditional methods of cooking and food making have always been attractive to the world. Pickling is one of the oldest methods of food preservation. Indian pickles play an important role in fruit and vegetable preservation industry.

Salt, Vinegar (8% acetic acid) and lactic acid/ Glutamic acid are the important constituents/ ingredients used in pickling processes. These substances when used in adequate amounts, act as preservatives either singly/collectively. The preservation of food in common salt/vinegar is called pickling. Spices & oil are also used.

In India, the pickles are being manufactured by a number of units. The manufacturing process is simple and the top product is having great demand. There is good demand for pickles in Andhra Pradesh and Orissa and also good export market. Today a large number

of branded products are in the market. Brand name is crucial in market. If the manufacturers maintain the high quality and hygiene, the products can move easily in the market. There is big competition in the market, even though there is good market scope in domestic as well as in overseas markets. Any entrepreneurs venture into this field will be successful.

Dehydrated Onion

Onion is one of the most important commercial vegetable crops grown in India. Both immature and mature bulbs are used as vegetable and condiment. It contains vitamin B and a trace of vitamin C and also traces of iron and calcium. The outstanding characteristic of onion is its pungency, which is due to a volatile oil known as allyl-propyl disulphide. Onions compared with other fresh vegetable are relatively high in food energy, intermediate in protein content and rich in calcium and riboflavin.

The main advantages of dehydrated onions are that they are easy to store, being lighter in weight and smaller in bulk than fresh or other processed onions. They are cheap to pack compared with canned goods. They do not require refrigerated storage as do frozen onions and the contents of a container can be used some time after opening provided they are not dehydrated. The newest dehydration process appears to be a variation on the air-drying process and is based on the principle of vapor pressure differentials, using air circulated around the onions at relatively low temperatures to ‘sweat’ the water from the food.

Onion is an important vegetable crop grown in India and forms a part of daily diet in almost all households throughout the year. onion is one of the most important but perishable groups known. It is also used for medical purpose. The global processed food market is estimated at \$3.2 trillion. The Indian food market is estimated at \$182 billion. Food

Egg Powder

Egg is one of the most versatile and near perfect foods in nature. It is rich in protein, amino-acids, vitamins and most mineral substances, the yolk and white components are all of high biological value and are readily digested. They are known to supply the best proteins besides milk. Eggs play important culinary roles and are therefore prepared into different dishes. Their functional properties of emulsification, thickening, foaming and moisturizing help contribute desirable characteristics and physical functions in the industrial production of many food products in which they are incorporated.

The egg processing operation separates eggs into different kinds of egg products: egg white, egg yolk, whole egg and several mixes i.e. by adding sugar or salt. The pasteurized liquid egg is either packed as a final product or, in case of egg powder production; it goes via pipelines into a spray dryer plant.

The current market share of India to the giant global market of \$117 billion is a meager 0.9 %, i.e. Rs 4,400 crore. India's nutritional supplement market is expected to more than double in the next four years to over Rs 17,000 crore. Indian market possesses demand for egg powder around 2300 MT/ year. The Growth Rate is >15% to 30%. As a whole establishing Egg Powder Unit is one of the project which has good prospect for the entrepreneurs to invest.

Packaging of Tomato Paste

Tomatoes are the most popular vegetable in the home garden. Tomatoes are widely grown in all parts of the world. They are available in a variety of sizes, shapes, and colors—including red, yellow, orange, and pink. Sizes vary from the bite-sized cherry tomatoes to the giant beefsteak varieties. Tomatoes may be round, oblate (fruit are flattened at the top and bottom), or pear-shaped. Tomatoes are low in calories and a good source of vitamin C and antioxidants. With their rich flavor and mild acidity, tomatoes have worked their way into thousands of recipes.

Tomato, like other vegetables/fruits is a perishable commodity and has a shorter shelf life in normal temperature. Therefore, problems are faced in the supply chain due to non-existence of a cold chain system in the country which results in losses of product and drastic price variations. Tomato Paste provides a way out with extremely positive outcome both commercially and financially. Indeed, tomato consumption by the food processing industry revolves around the availability of user friendly intermediate products like tomato paste, puree, ketchup and sauces.

The food processing industry has been slated for accelerated growth. It is projected to be a futuristic industry and it is anticipated that, over the years, it will emerge as a leading player in the global markets. As a result, the industry is seen to be witnessing feverish activity. The size of the processed food market is estimated to be over Rs 110 bn and is growing at 10 to 15% per annum. The Rs 4000-bn food market in India has been growing at the rate of 6.5% a year. The Indian middle class spends an estimated around Rs 700 bn annually on food and groceries alone. The ready-to-eat segment is growing faster as technology is improving and so is the lifestyle of the people. Due to demand growth, it is a good project for entrepreneurs to invest & any entrepreneurs venturing into this field will be successful.

Thermocol Cups, Glass and Plates

Thermocol is formed by the synthesizing of spherical particles consisting of air (at a rate of 98%) contained within an infinite number of hollow cells. These cells, forming a structure of pellets fused together, give consistency and rigidity to the final product. The advantages are many: the product's manufacturer requires very little energy, thereby allowing full weight to be given to ecological consideration. Of fundamental importance is the treatment with the vapor, which, as well as having a technical function during the manufacturing process, renders the product hygienic through sterilization. Thermocol is a good resister of cold and heat but since it is a petroleum product it dissolves in any solvent of petroleum.

Foamed plastics materials have achieved a high degree for importance in the plastic industry. Foams can be made soft and flexible to hard and rigid. Expanded polystyrene is one of such foams. It may be used such as thermal insulation material; acoustic treatments shock protective packaging, etc. Its properties can be varied widely in manufacture to meet both general and specific demands.

Today the demand on the global styrene market is on a gradual rise. The EPS and ABS demand rise is the key driver of the styrene market development. It is expected that the demand growth tempo will keep the significant indexes through the coming 2-3 years, supporting that way the styrene production and price in the foreseeable future. Polystyrene and Expandable Polystyrene Market is Expected to Grow at a Healthy Rate of 5.6% from 2010-2020. So any new entrants can venture in to this industry.

Activated Carbon from Coconut Shell

Activated carbon in any form of carbon shows high absorptivity for gases, vapours and colloidal solids in either the gas ion or liquid phase. It is available in many forms such as pellets, granules and in powder form. Activated carbon is very important chemical has wide application and employed by numerous industries which require absorption of certain gases and vapours in purification, in catalytic chemical reactions, decolorisation of vegetable oil and sugar solutions. Activated carbons have a large surface area, liquid phase activated carbons are light in weight, fluffy powder while gas phase activated carbons are hard and are in the form of pellets.

Almost any carbonaceous raw material can be used for the manufacture of activated carbon. Wood peat and lignite are commonly used for the decolourizing materials. Bone char made by calcining bones is used in large quantity for sugar refining. Nutshells coal, petroleum coke, and other residues forms are used for absorbent products. There is a considerable scope in India for the manufacture of activated carbon from the cashew nut shells.

The global activated carbon industry is estimated to be around 1.1 million metric ton. The U.S is the largest market, which will also pace global growth based on anticipated new federal regulations mandating mercury removal at coal-fired power plants. The activated carbon industry consists of more than 50 units spread countrywide most of which are in small-scale industrial sector (SSI Sector). Of the total number of units in operation, only 10 to 12 units cater to the national market while the other serve the local or regional markets. In general activated carbon is manufactured in the northern region from wood charcoal (mostly made from pinewood) whereas in the southern region, it is made from charcoal of the hard shell of coconut. The total installed capacity of the industry is presently estimated at about 40,000 tons per annum and production is put at around 30-35,000 tons, which includes purified regenerated carbon. Any entrepreneurs venture into this field will be successful.

Pan Chutney

The Betel (Piper betle) is the leaf of a vine belonging to the Piperaceae family, which includes pepper and kava. It is valued both as a mild stimulant and for its medicinal properties. Betel leaf is mostly consumed in Asia and elsewhere in the world by some Asian emigrants, as betel quid or paan, with or without tobacco, in an addictive psycho-stimulating and euphoria-inducing formulation with adverse health effects. The betel plant is an evergreen and perennial creeper, with glossy heart-shaped leaves and white catkin.

Betel chewing is firmly embedded in the traditions of South-East Asia and enjoyed, even revered, on several levels. The most obvious reason as to why people chew betel is for social affability, in a way similar to westerners drinking coffee together. The betel quid is also used as a medicine to cure a variety of illnesses ranging from headaches to skin infections. Betel is also believed to be a powerful link in contacting supernatural forces and as such is intricately entwined with the rites of animistic worship which give it magical qualities.

There are so many flavored pan chutney which has smoothly accepted by Indian people due to their variable tastes. Many dried fruits are used to make this like mango, pineapple, strawberry, saffron, khus etc which gives a unique taste to it and makes it attractive and addictive to the people fond of paan. The markets of pan chutney are growing more in India and it has ample scope to take the attention of paan lovers for more sell. Some companies like Gopal, Minar, Meenakshi are leading with that item and

they are expecting more growth in near future with lots of prospects. As a whole it is a good project for entrepreneurs for investment.

Now a day's use of spice as ground form is changed towards in the liquid form. It is actually use of spice oil. Spicy oil drops are so much more active rather than ground powder. Ground powder is much more used in compare to oil drops. Oil drops are basically essential aromatic oils, which has very good specific spicy flavour. For Export Oriented Unit, should be quality conscious. Laboratory should be cleaned. There is no adulteration in the product; product should be totally microbial free. Quality of the products and factory premises should satisfy I.S.O standard.

There is no other country in the world that produces as many kinds of spices as India. India grows over 50 different varieties of spices. The total

Card & Gray Board from Pulp and Waste Paper

Card Board and Grey Board are important grades of paper boards. The importance of paper board as an essential commodity is constantly increasing with the expansion of education among the people. Further, in a progressive society, the consumption of paper is closely linked to its economic, social and cultural activities. The consumption of card board, grey board, etc. in for various purposes such as, for making cartons for medicines, for pharmaceutical packagings, for making boxes for shoes, hosiery and other items for book-binding, for making registers for flat files, for sale of textile goods etc.

Card Board & Grey Board itself in a superior packaging material and due to rapid industrialization is in very good demand. Grey board is a homogeneous board made usually of mixed waste paper with or without screenings and pulp on a board machine. Grey board is used where stiffness rather than printability is required. Plenty of raw materials for making of the boards are available in India.

The world consumption of paper and paperboard is estimated at over 300 mn tonns a year. It is constituted broadly of 30% of cultural papers (writing and printing), 14% of newsprint, and the balance of kraft and packaging paper including paperboards. The Indian production is about 2 to 3% of the global total. The overall value of the market is estimated at Rs 250 bn. In volume terms, the segment is presently estimated at over 6.9 mn tonne. In India, the cultural varieties account for over 40% of the production and speciality papers including coated papers for about

8%. This leaves about less than half for kraft and boards if the newsprint varieties are excluded. The newsprint takes over a million tonne or about 15% of the total. Due to demand growth, it is a good project for entrepreneurs to invest.

Corn Flakes

Corn flakes being one of most nutritious foods and is consumed as breakfast food not only in India but-elsewhere in the world. Basically, it is prepared from maize; this is the main raw material. Flavours, like sugar or salt, are also added. Maize, the main raw material, is itself a corn grain.

The maize is processed for the manufacture of oil, flour, starch, liquid glucose, dextrose etc. Besides popcorn, another snack foods made from maize, maize is also used for the manufacture of corn flakes. Roasted corn flakes are generally used as breakfast good with milk. Raw corn flakes are used by the liquor-manufacturing units for manufacturing of beer. Fried corn flakes are also served as snack foods.

It all began with Kellogg's entry in India with its cornflakes. It was marketed by the establishment of a 100% subsidiary as Kellogg's India, being the parent company's 30th manufacturing facility, at a total investment of USD 30 mn at Taloja, near Mumbai (Maharashtra). India is considered as one of the largest market for breakfast cereals worldwide. The company was aiming at a business volume of Rs 2 bn in three years' time. When Kellogg's entered India, the per capita consumption of breakfast cereals was a low 2 gm per family per annum which increased to 4.5 gm against 5 kg per annum globally. Any entrepreneurs venture into this field will be successful.

BOOKS ON PULP, PAPER CONVERSION, PRINTING AND PACKAGING

Hand book on PRINTING TECHNOLOGY (Offset Gravure Flexo Screen)

The developments in science and technology have revolutionized the printing industry in the progressive countries of the world. There has been a considerable compact of this progress in the Indian Printing Industries. ₹1275 US\$125

The Complete Book on Printing Technology

This is the age of hi-fi, jets and computers. Rapid advancements in science and technology have made their impact on the printing industry of the world too. The old techniques of printing have become obsolete and made way for the new technology. The book contains the latest printing processes like web, gravure, flexo, security and offset printing. ₹1100 US\$125

Modern Technology of Pulp, Paper And Paper Conversion Industries

The paper conversion sectors are assuming increasingly important place in the life of every nation. Conversion technology is being evolved continuously for having better conversion, handling, transportation, preservation and usage of materials. Paper and pulp industry plays a vital role towards conversion. In view of the close linkage between paper and conversion industry we have tried to come out with this unique book containing relevant and useful information in both these industries. We have tried to make it most exhaustive first giving details, then presenting and dividing in different chapter to understand better. Thus we have tried to fill the vacuum that existed fill now. ₹1000 US\$100

The Complete Technology Book on Pulp & Paper Industries

The pulp and paper industry continues to expand at a phenomenal rate. This imposes a difficult problem of selection. Since the amount of material that can be included in a single volume is obviously limited. Careful thought has been given to the selection with the purpose of presenting that material which will be of the greatest interest to the greatest numbers. ₹1100 US\$125

HANDBOOK ON Modern PACKAGING INDUSTRIES

The book has been written for the benefit of entrepreneurs who can not invest large amounts and case has been taken to present the matter in a very simple and comprehensive language so that person without much technical background can grasp the subject easily. ₹1675 US\$150

Screen Printing Technology Hand Book

This method of Printing has achieved wide spread popularity since the second world war, although the basic ideas in this process were used by the Chinese centuries ago. The present book contains latest technologies of screen printing along with machinery photographs, addresses of suppliers of machinery and raw materials. ₹1000 US\$100

BOOKS ON TEXTILE PROCESSING, SPINNING, WEAVING, DYES, PIGMENTS, DYE INTERMEDIATES AND STARCH

The Complete Technology Book on Textile Spinning, Weaving, Finishing & Printing

The Book is based on the latest technology involved in textile industry. It contains processes of textile spinning, weaving, finishing and printing. ₹1100 US\$125

HANDBOOK ON NATURAL DYES FOR INDUSTRIAL APPLICATIONS

This is a single book which has information related to extraction of dyestuffs from 19 common flowers, weeds, bark or leaves and its application on cotton silk and wool fabrics for textile industry. The book describes the step wise methodology of extraction, mordanting and dyeing with photos of the actual plants part used for extraction of Natural dye. Shade cards have been incorporated so that the full gamut of colors can be visualized from each dyestuff. The Author Dr Padma S Vankar, works as Principal Research Scientist, in Facility for Ecological and Analytical Testing (FEAT) at Indian Institute of Technology, Kanpur. She has been engaged in the screening and characterization of newer natural dyes for the past 10 years. She also works in the area of designing synthetic strategies for Ecofriendly dyes using microwave heating system. Using innovative technology for natural dyeing has been her main emphasis. The author has conducted several workshops throughout India in order to popularize natural dyeing. ₹1100 US\$125

The Complete Technology Book on Textile Processing with Effluent Treatment

The book covers complete details of textile processing with the standard parameters of effluents treatment which is the burning problem for the textile processors. ₹1000 US\$100

Modern Technology of TEXTILE DYES & PIGMENTS

This is one of the best books on Textile Dyes and Pigments covering Formulae, Manufacturing Processes of Various Textile Dyes and Pigments. This book will be very helpful to new entrepreneurs, researchers, general information seekers and libraries or those who wants to diversify in this field. ₹1100 US\$100

The Complete Technology Book On STARCH AND ITS DERIVATIVES

Starch is a group of polysaccharides, composed of glucopyranose units joined together by glucosidic linkages. Industrially, starch is broadly divided in to two types of viz. natural and modified. The characteristics of the natural starches are changed by chemical or enzymatic reaction and the products of these reactions are termed modified starches. Starch can be obtained from maize, sorghum, roots and tubers such as tapioca, arrow root, potatoes etc. ₹1100 US\$125

The Complete Technology Book on Dyes & Dye Intermediates

Due to increasing growth of Textile industries, demand of Dyes and Dye Intermediates are also increasing very fast in domestic as well as in global market. The book stress on syntheses of different types of Dyes and Dye Intermediates. The formulae and processes has been described in very proper way. ₹1100 US\$125

Natural Fibres Handbook with Cultivation & Uses

The present book is the first of its kind which contains process and other parameters for the manufacturing of fibres arrives from natural sources. Due to eco-friendly nature there is very good domestic and export potentiality of natural fibre. ₹1275 US\$125

The Complete Book On Natural Dyes and Pigments

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different natural dyes and pigments, which has huge demand in domestic as well as in foreign market. ₹1100 US\$125

BOOKS ON SOAPS, DETERGENTS AND COSMETICS

Modern Technology of Soaps, Detergents & Toilettries

(With Formulae & Project Profiles) 3rd Edn. The book contains the formulae of different types of soaps, detergents (cake, powder and liquid) toilettries, analytical testing method, quality control of finished products, packing criteria of cosmetics and toilettries alongwith project profiles and addresses of raw material, plant and machinery suppliers. ₹750 US\$100

The Complete Technology Book on DETERGENTS

The Indian detergent industry is about three decades old. An interesting and unique feature of detergent industry in India is the existence of non-power operated units which do not use any electrical power for the production of detergent powder. This text emphasizes practical aspects of detergent production with latest development and other special products based on synthetic surfactants. This book is an attempt to fill the need of those desirous of starting detergent industries in small scale sector. ₹1100 US\$125

Soaps, Detergent and Disinfectants Technology Handbook

It has been said that soap and detergent consumed in a country is a reliable measure of its civilization. There was a time when these products were luxury, now it is a necessity. The present book contains formulae, processes of different types of soap, detergents and disinfectants. These products have good demand in domestic as well as in international market. So there is very good scope for new entrepreneurs to venture into this field. This book is very useful for entrepreneurs, technocrats and for those who to diversify to this field. ₹1275 US\$125

Hand Book on SOAPS, DETERGENTS & ACID SLURRY

3rd Revised Edn. The Soap and Detergent industry is profoundly lucrative with splendid market potential as well as bright future scope. In order to meet the requirement of market demand, many more new units are recommended to be established on small and cottage scale. The present book has been written keeping in view the basic difficulties of the entrepreneurs. Nominal investment is required for this industry which comprises simple methods of processing for manufacturing of various types of soaps, detergents and acid slurry. ₹1575 US\$150

The Complete Technology Book on Soaps

Being consumable in daily life soap industry is profoundly lucrative with splendid market potential. This industry has very good future prospects. Many more new units are recommended to meet the requirement of Indians demand. The book covers formulae, processes of different type of washing and toilet soaps. ₹800 US\$100

Modern Technology of COSMETICS

The manufacture of Cosmetics is by no means new methods adopted were used several decades ago. The attempt made in this book is to improve the older methods and provide the latest formulae and techniques to manufacture the different cosmetics like Hair Preparations, Face Lotions for various uses, Lipsticks, Shampoos, Dandruff Tonics, Nail Polishers etc. ₹1100 US\$125

BOOKS ON WOOD, LEATHER, GLASS & CERAMICS

The Complete Technology Book on Wood and Its Derivatives

The developments in wood industry in the country are mainly attributed to the pioneering work carried in the field of wooden products. There are lot of chemicals and other products extracted from wood. This book contains processes of various wooden products and its derivatives. ₹1100 US\$125

LEATHER PROCESSING AND TANNING TECHNOLOGY HANDBOOK

The profitability of leather processing is dependent on a good product and requires the consistent implementation of well under stood process. This book covers latest techniques of leather processing and tanning, so that the industries involved in this process and new entrants can grow up with new technology. Leather tanning as an industry has been subjected to evolutionary forces as technology makes use of new materials, technique and concepts. ₹1400 US\$150

The Complete Book on Glass And Ceramics Technology

The technology of glass and ceramics are nowadays wide field involving a great variety of raw materials, manufacturing processes, as well as products, and of considerable diversity in theoretical background. The manufacture of traditional glasses and ceramics is based on the utilization of the most widely occurring natural raw materials. The efforts has been made to provide maximum and latest information about processing of glass and ceramics and their products in this book. ₹1275 US\$125

Tyres for Truck, Lorry, Bus, Car & Cycle

The tyre industry is the largest part of the rubber manufacturing industry, infact it is so large that it is often classed as an industry in its own right. It absorbs well over two thirds of all natural rubber production and almost as large a proportion of synthetic rubber manufacture. In much of the innovation in the wider rubber industry both in terms of material and in terms of manufacturing emanates from the tyre industry.

Light vehicle tyre and heavy truck and machinery tyre are both part of the tyre market but differ in their composition and manufacturing process. Hence light vehicle tyres are particularly passenger's car tyre. Advances in tyre materials, tyre constructions and tyre manufacturing technology have led to new types of products and the development of new market segments. Tyre manufacturing technology has progressed in parallel with tyre construction technology so that tyres are now designed not only to meet specific performance targets, but also to enable improved 'manufacturability', i.e., more efficient, lower cost and more uniform production.

The Indian tyre industry has come of age with the manufacture of almost all types of tyres. The industry has an estimated turnover of close to Rs 200 bn. It is made up of 40 players with an installed capacity of 57.3 mn tyres. The industry claims a perceptible export market. Like the commercial vehicles and tractor segments, the off take of cars and two-wheelers has been fairly steady. Production in most segments has increased by about 6%. There has been a steady flow of replacement market demand for two-wheeler and car tyres. This and the increase in production of motorcycle tyres have sustained the production of tyres in the two-wheeler segment.

As a whole establishing Tyres Unit is one of the project which has good prospect for the entrepreneurs to invest.

Latex (Rubber) Foam Product

Latex is originally defined as the stable dispersion of natural rubber particles in aqueous medium as produced in the rubber tree. They are complex colloid systems containing polymer molecules as major fraction. The polymer may be a homo polymer or co-polymer. Stereo regularity and the complexity of the polymer molecules (linear / branched / cross linked) is maintained in the latex form. Lattices are rubbery or resinous in nature and the rubber molecules can be cross linked. Lattices can be plasticized or oil extended. Lattices have their own mechanical properties and temperature limits of serviceability.

Latex is a dispersion of rubber particles in an aqueous phase. Most types of rubber, both natural and synthetic, can be made into a latex form. Latex gets used in specialized applications such as those requiring oil, solvent or flame resistance. Different mixing techniques produce different grades of dispersions i.e. ball milling or ultrasonic's for fine particle dispersions and simple stirring or colloid milling for coarse dispersions. Latex dipping is used to make thin articles such as gloves, balloons, catheters, bladders; hot water bottles etc and very fine particle dispersions are needed. Coarser particle sized dispersion (slurry) is acceptable for latex foam, used mainly for carpet backing. The following range of additives can be mixed with the latex dispersion or emulsion:

It is a worldwide multibillion dollar industry, A steady flow of new plastic materials, production processor & market demands has caused tremendous growth at 15% annually over 35 years. The global consumption of all plastics 80 million tonnes a year now. As a whole establishing Latex Foam Product Unit is one of the project which has good prospect for the entrepreneurs to invest.

BOOKS ON CONSTRUCTION MATERIAL

The Complete Book on **Construction Materials**

The book provide wide coverage of building materials such as stone, bricks, lime, mortars, concrete, asbestos, gray iron, cast iron, steel castings, aluminium, wood, architectural paints and so many others with their applications in building construction. The book is very useful for all professionals related to construction field, technocrats, students and libraries. **₹1475/-, US\$ 150**

The Complete Technology Book on **Bricks, Cement and Asbestos**

Bricks, cement and asbestos have major role in building and road construction. The present book contains processes of different types of bricks making, cement manufacturing and production of asbestos. The book is very useful for new entrepreneurs, existing units, professionals, institutions related to building construction, research scholars etc. **₹ 1400/-, US\$ 150**

FORMULARY BOOKS

SELECTED FORMULARY HANDBOOK

A man entering an industry soon finds that most of the products manufactured by his company are not synthetic or definite chemical compounds, but are mixtures, blends or highly complex compounds of which he knows little or nothing. The literature in this field, if any, may be meager, scattered or antiquated. The purpose of publishing this book is to provide proper formulations of most consumable products. The book is very useful for chemists, new entrepreneurs, existing units, technocrats and engineering students. **₹1475/- US \$ 150**

BOOKS ON INKS, GUMS & ADHESIVES, PAINTS, SURFACE COATING

Modern Technology of **Printing & Writing Inks**

The Printing and Writing Ink Industries have grown significantly during the last decade. Particularly printing ink industry is characterised by exceeding high margin profit. Having in view we have published this book which will be mile stone for the entrepreneurs, existing units, libraries etc. The book contains formulae, processes and other related information of various printing and writing inks. **₹750/- US \$ 100**

Modern Technology of **PAINTS VARNISHES & LACQUERS 2nd Edn.**

Surface coating industry is one of the most popular industries. Paints, Varnishes and lacquers industry is gaining ground at a rapid pace in modern time accompanied with closed advance in surface coating technology. The book deals with fundamentals of paints, varnishes and lacquers, oils used in paints and varnishes, solvents, driers, pigments, plasticizers, additives for surface coating, various types of paint manufacturing etc. **₹1075/- US \$ 125**

The Complete Technology Book on **Printing Inks**

The beginning of ink making are something of a mystery. It is certain however, that the development of the art of writing proceeded the invention of ink by almost a thousand years. Prior to the invention of ink the ancients wrote with a pointed metal stylus on tablets of stone and clay. In this book an attempt has been made to bring together the useful manner as possible the fundamental Principles of ink making. The book contains formulae, processes and other relevant information of the manufacturing of different types of printing inks. **₹1000/- US \$ 100**

Gums, Adhesives & Sealants Technology With Formulae & Their Applications 2nd Rev. Edn.

Gums, Adhesives and Sealants are occupying by and large, a conspicuous plateau in the modern industrial world by virtue of their versatility in diverse fields of applications. This potentially useful book furnishes technical aspects of various types of gums, adhesives and sealants which are so useful to a new entrepreneurs or established one. The book delineates in detail formulae, processes of various gums, adhesives and sealants along with addresses of machinery and raw material suppliers. **₹1475/- US \$ 150**

Modern Technology of **SURFACE COATING With Formulae & Their Applications**

The development of science and technology revolutionized the surface coating industry in the progressive countries of the world. There has been considerable impact in this field. We have completely replaced costly petroleum solvent with water. So we get cheaper finished products with no evaporation loss and tire hazard. So we can say surface coating industry is now eco-friendly. **₹ 975/- US \$ 100**

ADHESIVES FORMULARY HANDBOOK

Adhesives have so importance and are extensively attached to our infrastructure that we cannot isolate in from our daily needs. From school going children to housewives to jet manufactures to Atomic Explosion, every where adhesives plays a very important role. **₹1275/- US \$ 125**

Handbook on Speciality Gums, Adhesives, Oils, Rosin & Derivatives, Resins, Oleoresins, Katha, Chemicals with other Natural Products

The forest in India yields a large number of products, which play an important role in the economy of the country. This book contains processes of forest based products like Gums, Resins, Oleoresins, Essential Oils and other natural products obtained from Indian forests. It gives an insight of richness and vastness of the forest wealth. **₹1275/- US \$ 125**

Paints, Pigments, Varnishes And Enamels Technology Handbook

Painting is older than writing. It began twenty thousand years ago when the Stone Age man drew pictures with earth colours on the walls of caves in northern Spain and southern France. Now a days paints play a critical role in preventing corrosion and enhancing aesthetic values in various segments such as architectural household applications, automobiles, industrial equipments, ships, aircrafts etc. The present book covers the various formulae and processes of paints, pigments, varnishes and enamels. **₹1100/- US \$ 125**

- Graphite Carbon Plate
- Graphite Crucibles
- Graphite Electrode for Arc Furnace
- Grinding Wheel Making Plant
- Gypsum Based Products (Gypsum Powder, Gypsum Board & PVC Laminated Gypsum Ceiling Tiles (Integrated Production Unit)
- Gypsum Plaster Board
- Hollow Blocks & Paving Tiles
- Hollow Concrete Block
- Lime Bonded Fly Ash Bricks
- Magnesite Bond Polishing Brick, Magnesite Resin Bond Polishing Brick for Granite
- Marble from Marble Mining
- Marble-Granite Cutting & Polishing Unit
- Mini Cement Plant
- Mini Cement Plant (Slag Cement)
- PCC/RCC Pipes
- Plaster of Paris (P.O.P.)
- Plaster of Paris Bandages
- Plaster of Paris Board from Process of HAcid Gypsum
- Portland Cement
- Precast Concrete Compound

- Wall
- Prestressed Concrete Sleepers
- Process Food & Spices
- Ramming Mass and Fire Bricks from Magnesite
- Resin Bond Polishing Brick & Resin Bond Final Polishing for Marble & Granite
- Rock Sand
- Salt Glazed Stone Ware Pipes & Fittings
- Sand Lime Bricks Manufacture
- Semi Automatic Brick Plant
- Solvent Cement
- Spun Concrete Pipe Utilization in Dist. of Electrical Line
- Stone Crushers
- Vitriified Tiles
- White Cement

ADHESIVES, INDUSTRIAL ADHESIVE, SEALANTS, GLUES, GUMS, BINDERS

BOOKS ON RUBBER, FIBER/OPTICAL GLASS, PLASTIC, POLYMERS, PETROLEUM GREASES, PETRO CHEMICALS, WAX, POLISHES & CHEMICAL INDUSTRIES

Modern Technology Of **Industrial Chemicals**

In modern age Chemical Industries have permeated most extensively in comparison with other industries, and are progressing at a very rapid pace. This book elucidates chemicals which have good market potential. This book deals with manufacturing processes with reaction, technical details, equipments involved in processing etc. **₹1100 US\$125**

The Complete Technology Book On **PESTICIDES, INSECTICIDES, FUNGICIDES & HERBICIDES WITH FORMULAE & PROCESSES**

Pesticides, Insecticides, Fungicides and Herbicides are used in agriculture, forestry, animal husbandry, commercial centers and houses for the pest control. During last 35 years, consumption of these products has increased manifold and industries are coming up throughout the world due to its increasing demand. The book contains formulae, processes of different types of pesticides, insecticides, fungicides and herbicides. **₹1100 US\$125**

The Complete Technology Book on **FINE CHEMICALS**

Fine chemicals are the chemicals which are produced in comparatively small quantities and in relatively pure state. Fine chemicals correspond to a distinct segment of the chemical industry, including low tonnage molecules (typically 10-20 Kt). Pharmaceutical and Biological Products, Perfumes, Photographic Chemicals and Electronic Grade reagents are examples of fine chemicals. High purity reagents (99.999999% pure) are also classified as fine chemicals. Globally, the fine chemicals industry continues to be very fragmented in spite of some consolidation, partly due to the limited impact of economy of scale on the business. While, fine chemicals do offer limited albeit real opportunities for product differentiation, in contrast to commodity chemicals, they are unlike specialties, which offer much larger scope for standing out due to an enhanced contribution of technical services and application know how. **₹1100 US\$125**

The Complete Book on **Distillation and Refining of Petroleum Products**

The most dynamic industry of the century is the petroleum and petrochemicals industry. It has taken the fundamental knowledge of chemists and chemical engineering and transformed itself from a simple processing industry for fuel and lubricants to an extremely complex chemical process industry which has branched out into synthetic rubber, plastics, fertilizers and many other fields. The book presents Practical information and data which will help oil companies, large scale users of commercial petroleum products in efficient storage, handling and utilization of these products. Different formulae, processes for the production of petroleum products are given in this book. **₹975 US\$100**

Handbook of **Fine Chemicals, Vitamins, Amino Acids and Proteins**

The aim of this book is to present in a single volume an up to date account of the manufacture of Fine Chemicals, Vitamins, Amino Acids and Proteins. The book includes several new information which comprise important threads in the industry's total fabric. This book contains the constitution and synthesis of the Amino Acids, the Isolation of the Amino Acids from Proteins, the preparation of Amino Acids and Proteins, Vitamins and Fine Chemicals with Method of analysis and reactions etc. **₹1450 US\$150**

DRUGS & PHARMACEUTICAL TECHNOLOGY HANDBOOK

India has come a long way in the field of manufacture of Drugs and Pharmaceuticals. From a country importing more than 95% of its requirement of Drugs and Pharmaceuticals, India now is exporting it even to developed countries. The modern Indian Pharmaceutical Industry is recent and its foundation was laid in the beginning of the current century. The pharmaceutical industry can be broadly categorised as Bulk Drugs, Formulations, IV Fluids and Pharmaceutical Aids (such as medical equipment, hospital disposables, capsules, excipients etc). Special feature of the pharma industry is a large number of manufacturers in the small scale sector. The government is also encouraging the SSI sector providing some incentives. **₹1075 US\$125**

The Complete Book on **Medical Plastics**

The use of plastics in health care field encompasses several distinct markets. Plastic is used on a large scale as medical devices like disposable syringes, optical and dental products, heart valves, contact lenses and many more medical products. This way plastic has very importance in making medical devices. The present book contains the important information of plastics in medical field and their uses in various ways. **₹975 US\$100**

The Complete Book on **Rubber Processing and Compounding Technology**

Rubber products industry is an important resource based industry sector in India. Over the last decade the rubber industry has witnessed a steady and strong growth. Rubber can be deformed to a high degree of strain in a reversible manner and this special property finds use in fields as diverse as transportation, material handling, health care, and sport and leisure activities. The book covers manufacturing processes of rubber products, compounding of rubber, quality assurance, applications etc. **₹1575 US\$150**

The Complete Technology Book on **Plastic Extrusion, Moulding and Mould Designs**

There are fundamentally two different methods of extruding film, namely, below extrusion and slit die extrusion. The design and operation of the extruder upto the die is the same for both methods. The moulding process is one of the most important plastic processing operations. It is an important commercial process whereby a resinous polymeric compound is converted into useful finished articles. The origin of this process is dates back about a century to the invention of a plunger type machine. The moulds have its own importance, which give the required shapes of the products. The book covers manufacturing processes of extruded and moulded products with the various mould designs. **₹1000 US\$100**

The Complete Technology Book on **Fibre Glass, Optical Glass and Reinforced Plastics**

Although many natural materials were used in the past by man, answering his instinctive urges to prevent heat loss from or entry into his dwellings, no material in modern technology has satisfied the all around requirements as has fiber Glass, Fiber glass, Optical glass and reinforced plastics have important applications and uses in the making of various products. The present book contains processes and other valuable information for fiber glass, optical glass and reinforced plastics. **₹1275 US\$125**

The Complete Technology Book on **Plastic Films, HDPE and Thermoset Plastics**

Plastic Films, HDPE and Thermoset Plastics are now an accepted part of the industrial and domestic scenes but this growth has been comparatively recent. The major applications of HDPE are in the manufacturing of containers, pipes, house wares, toys, filament, woven sacks, film, wire and cable insulation. Thermoset is a polymeric material which can be formed by the application of heat and pressure, but as a result of a chemical reaction permanently cross links and cannot be reformed upon further application of heat and pressure. The present book offers an up to date overview of the processing of plastic films, HDPE and thermoset plastics. **₹1175 US\$125**

Modern Technology of **PLASTIC PROCESSING INDUSTRIES** 2nd Ed.

This book covers thermosetting, thermoplastic materials and products environment health and future prospects. All plastic allied products presenting with latest technology, development and manufacturing process including with some profitable plastic project profiles. A part from this, directory section is also included ie manufacturers of plastic processing machinery and raw material suppliers with Tel. and Fax Nos. **₹975 US\$100**

HAND BOOK ON **BIO-DEGRADABLE PLASTICS (ECO-FRIENDLY PLASTICS)**

Waste Plastics suffocated soil clog drainage and lead to whole lot of ecological problems, they have debilitating effects on ecology. This is the first book of its kind which give the complete information about bio-degradable plastics. **₹600 US\$100**

POLYMERS AND PLASTICS TECHNOLOGY HANDBOOK

The book has been designed with the idea of blending and integrating basic polymer science and the technology of plastics into a composite structure. This book is an outcome of an endeavour in the direction of polymer and plastic processing. **₹750 US\$100**

Modern Technology of **Plastic & Polymer Processing Industries**

This book offers, in a standardized and readily accessible information on the synthesis, structure, properties and applications of the most important polymeric materials. It has been designed as a text giving a balanced coverage of the science and technology of polymers finding major applications a plastics. **₹750 US\$100**

The Complete Technology Book On **Chemical Industries**

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems. **₹975 US\$100**

Modern Technology of **Petroleum, Greases, Lubricants & Petrochemicals**

Lubricants, Greases and Petrochemicals are most versatile on the industrial Plateau now a days. The significance of Lubricants, Greases & speciality products in the day-to-day functioning of nearly every machine part, instrument, appliance & device can not be over emphasized lubricants reduce friction & wear between rubbing parts, there by enhancing their life. The basic object of this book is to furnish comprehensive information about nearly all prominent types of Lubricants, Greases & Petrochemicals. This book covers formulae, processes of various petroleum items. **₹1100 US\$100**

Industrial Chemicals Technology Hand Book

The book contains manufacturing processes, reactions, equipments details, process flow diagram of number of chemicals, which have huge industrial uses. This book is very useful for new entrepreneurs, industrialists, consultants, researchers, schoolers, technical institutions, chemists and libraries. **₹1100 US\$125**

Hand Book on **CHEMICAL INDUSTRIES (ALCOHOL BASED)**

Alcohol is a very valuable material which has variety of uses such as for production of chemicals, as a source of energy and fuel etc. The book covers manufacturing details of various alcohol based chemicals. **₹750 US\$100**

Speciality Plastics, Foams (Urethane, Flexible, Rigid) **Pet & Preform Processing Technology Handbook**

Polymer science is a specialised phase of organic chemistry, except in the case of inorganic silicones. Plastic technology is one of the fields where people can show their ability and performance both theoretically and practically. The book covers processes and other required information for the manufacturing of different Speciality plastics, Foams, PET and Pre-form PET etc. **₹1275 US\$125**

The Complete Technology Book on **Expanded Plastics, Polyurethane, Polyamide and Polyester Fibres**

Expanded plastics are also known as foamed plastics or cellular plastics. Expanded plastics can be flexible, semi flexible, semi rigid or rigid. They can also be thermoplastic or thermosetting and can exist as open-celled or closed-celled materials. The Polyurethanes are among the most recent additions to the many commercially important classes or polymers. Urethanes can be considered esters of the unstable carbamic acid or amide esters of carbonic acid. The present book covers processes of expanded plastics, polyurethane, polyamides with other related information required by an entrepreneur. **₹1275 US\$125**

The Complete Technology Book on **POLYMERS (with Processing & Applications)**

Three factors are essential for any successful processing of polymers, namely materials, machinery and process control. The materials presently used comprise all existing thermoplastics and thermosets in the molecular weight range from 15000 to several million. Polymers have importance in manufacturing of various domestic and industrial products. The present book covers the latest technology of polymer processing and its related products. This is very useful book for new entrepreneurs, professionals, technocrats, researchers and technological institutions etc. **₹1100 US\$125**

The Complete Technology Book on **WAX AND POLISHES**

Wax and polishes are used for many purposes. Wax has their principal use in waterproofing. Some other important uses are in candles, polishes, electrical insulation, coatings and carbon paper. There are various types of polishes having industrial and domestic applications. The purpose of this book is to present a comprehensive information of different types of wax and polishes like their processing, properties and uses. **₹1675 US\$150**

The Complete Technology Book on **Industrial Polymers, Additives, Colourants and Fillers**

It is well known that the major consumption of additives is in PVC compounds. Approximately 90% of additives are being used in PVC, however the left over 20% is consumed in compounding of other thermoplastics. Plastic master batches and fillers have their own importance in plastic processing industries. The present book through light on processing of industrial polymers, additives, colourant and fillers. **₹1100 US\$125**

The Complete Book on **Biodegradable Plastics and Polymers**

(Recent Developments, Properties, Analysis, Materials & Processes)
In response to public concern about the effects of plastics on the environment and in particular the damaging effects of sea litter on animals and birds, legislation is being enacted or is pending in many countries ban non-degradable packing, finishing nets etc. Waste plastics suffocate soil, clog drainage and lead to a whole lot of ecological problems-they have debilitating effect on ecology. Environmentally acceptable degradable polymers have been defined as polymers that degrade in the environment by several mechanisms and culminate in complete biodegradation so that no residue remains in the environment. The present book gives thorough information to biodegradable plastic and polymers. **₹1275 US\$125**

**HERBAL COSMETICS &
 AYURVEDIC MEDICINES (BOU)** (3rd Rev. Edn.)

This book is very useful for entrepreneurs, industrialists, project consultants, libraries etc. and has special reference for Herbal Cosmetics and Ayurvedic Medicines with formulae, processes, foreign buyers, Machinery and raw material sources, project profiles etc. ₹1475 US\$150

**Hand Book On
 Unani Medicines**

With Formulae, Processes, Uses And Analysis

Tremendous progress has been registered in the development of modern medicine. Yet, medicinal plants continue to be an important source of drugs throughout the world. Unani medicine is one of them. Plant as a source of drugs of much more important for the developing countries of Asia, Africa and South America. This publication is one of its kind which clearly indicates the usefulness of Unani medicine, shows how the plant secrets, preserve the natural secrets/hormones/juices which ultimately uses in Unani system of medicine. ₹1100 US\$125

**Hand Book on
 Ayurvedic Medicines**

With Formulae, Processes & Their Uses (2nd Rev. Edn.)

This is the first book of its kind which contains formulae and processes of different types of Ayurvedic Medicines like Churn, Capsules, Cyruaps, Sharbats, Pastes etc. Used in various diseases. ₹1475 US\$150

**HAND BOOK ON
 Herbal Drugs and Its Plant Sources**

Medicinal plants have been used as a major source of therapeutic agents by human being for thousands of years. Ancient men obtained more than 90% of his medicaments from higher plants. However, the importance of plants as a source of drugs decreased to certain extent. In spite of the fact that synthetic drugs and antibiotics have improved the life expectancy of man, plants still constitute as one of the major sources of raw materials for drugs all over the world. This particular book clearly described the original source of such drugs, which is beneficial to scientists and scholars. ₹1000 US\$100

HERBAL FOODS AND ITS MEDICINAL VALUES

Food has been a basic part of our existence. Through the centuries we have acquired a wealth of information about the use of food as a part of our community, social, national and religious life. It has been used as an expression of love, friendship and social acceptance without knowing the medicinal values of such food. This book for the first time reveals the exact medicinal characteristics and how it works and cures the different disease to make mankind healthy. ₹1275 US\$125

**Handbook On
 Medicinal Herbs With Uses**

Medicinal herbs are the local heritage with global importance. World is endowed with a rich wealth of medicinal herbs. The Variety and sheer number of plants with therapeutic properties is quite astonishing. Medicinal herbs have curative properties due to presence of various complex chemical substance of different composition, which are found as secondary plant metabolites in one or more parts of these plants. These plant metabolites, according to their composition, are grouped as alkaloids, glycosides, corticosteroids, essential oils etc. During the past decade, a dramatic increase in exports of medicinal herbs attests to worldwide interest in these products as well as in traditional health systems. The pharmaceutical industries have made massive investment on pharmacological, clinical and chemical researches all over the world in past five decades. Efforts have been made to discover still more potent plant drugs. ₹1075 US\$125

**Hand Book on
 Neem and Allied Products**

The neem tree, which is also known as Margosa or Indian lilac, grown extensively in Asian and African countries. The neem is very useful tree due to its medicinal and insecticidal properties and can be grown even under semi arid and subhumid conditions upto 700m above sea level. The book covers cultivation of neem and processing of its products. ₹975 US\$100

**The Complete Technology Book On
 HERBAL BEAUTY PRODUCTS WITH
 FORMULATIONS AND PROCESSES**

Indian Medical System advocates the use of medicinal plants as drug source. Drugs obtained from plant origin occupy important position in different pharmacopoeist. Products from natural sources are an integral part of human health care system because of major concern about synthetic drugs and their side effects and toxicity. The ancient Indian system of medicine needs verification on modern scientific basis. An attempt to blend ancient and modern science as well as art could be fruitful and such attempts must be carried out on sound scientific basis. ₹1100 US\$125

**HERBAL COSMETICS
 Hand Book**

This is the first book of its kind which contains formulae and processes of various herbal cosmetics like cosmetic for the skins, cosmetics for bath purpose, cosmetics for nails, cosmetics for hair, oral cosmetics, analysis of cosmetics, test methods, machinery and raw material suppliers etc. ₹1500 US\$150

**The Complete Technology Book on
 Natural Products
 (Forest Based)**

The forest in India yields a large number of products, which play an important role in the economy of the country. This book contains processes of forest based products like Gums, Resins, Essential Oils and other natural products obtained from Indian forests. It gives an insight of richness and vastness of the forest wealth. This book is first of its kind, which covers comprehensive treasure of information on a wide variety of forestry products. ₹1275 US\$125

**Hand Book on
 Herbal Medicines**

The book contains Formulae of different Herbal Medicines used in all kind of diseases. This is the first book of its own kind. ₹750 US\$100

**Herbal Soaps &
 Detergents Hand Book**

The book covers formulae, processes of different types of herbal soaps & detergents being used in daily life. This is the first book of its kind. ₹1275 US\$125

**Hand Book on
 HERBAL PRODUCTS
 (Medicines, Cosmetics, Toiletries, Perfumes) 2 Vols.**

Both the volumes covers processes, formulations, analysis methods with the addresses of raw material and machinery suppliers, project profiles, list of manufacturers, exporters and overseas importers of various herbal medicines, cosmetics, perfumes and toiletries. The book also contains addresses of different Ayurvedic & Unani medicines research institutes. ₹1500 US\$220 (FOR BOTH VOLUMES)

**Compendium of
 Medicinal Plants**

The book contains systematic account of the most important plants used in medicines. Each chapter covers botanical descriptions, parts used, Ayurvedic properties, clinical uses, constituents with the figure of the plant. ₹875 US\$100

**Aloe Vera Handbook
 (Cultivation, Research Findings, Products,
 Formulations, Extraction & Processing)**

Aloe Vera is a semi tropical plant. There are over 250 species of Aloe grown around the world. It contains more than two hundred tonic ingredients including essential amino acids, minerals, vitamins, enzymes and steroids. Also contains the most essential components required by the human body. It is grown wild in hedge-rows in dry soil conditions and almost all parts of India. It can be grown even under constant drought conditions. Commercial cultivation and utilization of this plant with the application of technology can be of great value. ₹1275 US\$125
