Modern Technology of Paints, Varnishes & Lacquers
Surface coating industry is one of the most popular industries. Paints, varnishes and lacquers industry is gaining ground at a rapid pace in modern time accompanied with closed advance in surface coating technology. They are formulated for specific purposes: outside house paints and exterior varnishes are intended to give good service when exposed to weathering; interior wall paints are formulated to give excellent coverage and good wash ability; and lacquers are formulated for rapid drying. Varnish is one of the important parts of surface coating industry. Varnish is a transparent, hard, protective finish or film primarily used in wood finishing but also for other materials. They are used to change the surface gloss, making the surface more matte or higher gloss, or to provide the various areas of a painting with a more unified finish. Varnishes are also applied over wood stains as a final step to achieve a film for gloss and protection. Some products are marketed as a combined stain and varnish. Paint is any liquid, liquefiable, or mastic composition which after application to a substrate in a thin layer is converted to an opaque solid film. It is most commonly used to protect, colour or provide texture to objects. The paint industry volume in India has been growing at 15% per annum for quite some years now. As far as the future growth prospects are concerned, the industry is expected to grow at 12 to 13% annually over the next five years. The technology is required to produce different type of new paints and varnishes based on different type of uses. The paint and coatings industry plays an integral role in sustainability; coatings protect the objects we depend on every day, preserve our possessions, so they last longer and provide for a sustainable future. They are indispensable products that extend the useful life of everyday objects by acting as a protective barrier. These newer products have enabled paint manufacturers to improve the performance properties of their paints and coatings and so satisfy the more stringent requirements of our modern industrial society. The future for industrial paints, varnishes and lacquers is bright. In the next few years its value will go up gradually in line with the global trend.

The major contents of the book are application of paints, fundamentals of paint, varnishes and lacquers, manufacturing of different type of paints, paint formulation, pigment dispersion, emulsion paints, and so on. The book deals with fundamentals of paints, Varnishes and lacquers, pigments, Oils used in paints and varnishes, solvents, dryers, plasticizers, additives for surface coating, various types of paint manufacturing etc. The book is very useful for new entrepreneurs, existing units, technocrats, technical institutions and for those who wants to diversify in the field of paints manufacturing.

Content:
1. Application of Paints
Paint System Specification
Preparation of Paints
Establishment of the paint Manufacture Unit
Pigment
White Pigments
Black Pigments
Red Pigment
Green Pigment
Blue Pigment
Synthetic Ultramarine Blue
Yellow Pigment
Drying Oils & Driers
Drying Oils
Linsed Oil
Castro Oil & Dehydrated Castro Oil
Dehydrated Castro Oil (DCO)
Tung Oil
Soyabean Oil
Cashew Nut Shell Liquid (CNSL)
Other Less Important Oils
Refiningof Drying Oils
Driers
2. Fundamentals of Paint, Varnishes & Lacquers
Paint
Varnishes
Lacquers
Solvents
White Pigments
Red Pigments
Yellow and Brown Earth Colours
Orange and Yellow Pigments
Green Pigments
Blue Pigments
Black Pigments
Extenders
Oils Used In Paints
Resins Used In Paints, Varnishes And Lacquers
Solvents Used In Paints, Varnishes and Lacquers
Addittives Used In Paints, Varnishes and Lacquers
3. Oils Used In Paints and Varnishes
Drying Oils
Conjugated Oils
Semi Drying Oils
Non-Drying Oils
Derivatives of Drying Oils
Refining of Oils
4. Solvents
Hydrocarbons
Ketones
Esters
Glycol Ethers
Alcohols
Terpenes
5. Plasticizers
General Properties of Plasticizers
6. Additives in surface Coatings
7. Formulary with Processes of Distempers, Whitewash, Putties & Emulsion
White Distemper
Sky Blue Distemper
Yellow Distemper
White Wash
Putties
Non-Freezing Putty
Modified Putty
Emulsion Paints
8. Formulations
Enamels
Luminous Paints
Paint for Structural Steel
Asbestos Paints
Mica Lustre Paint
Aluminum Priming for Wood
Water Emulsion Paints for Exterior Use
Varnishes
Lacques
9. Lacquers
Cellulose Products
Ethyl Cellulose
Lacquer Manufacture
Mertis of Cellulose Lacquers
Aeroplane Lacquer
Book Lacquer
Varnishes
Different kinds of Varnishes
Oil Varnish
Turpentine Varnish
Spirit Varnish
Water Varnish
Oil Varnishes
Preparation of Oil Varnishes
Gum Running
Addition of Drying Oils
Thinning
Maturing
Different kinds of Oil Varnishes
Exterior Varnish
Interior Decorators Varnish
Rubbing Varnish
Polishing Varnish
Flat Varnish
Gold Size
Black Varnish
Formulase of Oil Varnishes
Spirit Varnish or Lacquer
Resins
Solvents
Plasticizers
Alcohol Varnish
Turpentine Varnishes
Formulas for Preparing Spirit Varnishes
French Varnish
Varnish Prepared from Synthetic Resins
Spar Varnish
Process
10. Paint Manufacturing Different Types of Paints and Various Formulations
Premixing
Grinding Operation
Tinting Operation
Oil Based Paints
Modern Gloss Finishes
Heat Resisting Paints
Flame Retardant Paints
Plastic Paints
Floor Paints
Flat Paints
Aluminium Paint
Wrinkle Finishes
Hammer Finishes
Marine Coatings
Introduction
Ship Paints
Hull Paints
Top Sides Finish
Boot Topping Paints
Antifouling Paints
Anti-Corrosive Paints
Road Marking Paints
Chemical Resistant Coatings
Synthetic Enamel Paints
Bittumious Coatings
High Solids Finishes
Curing Agent:
Graphite and Graphite Paints

11. Primers
Primer for Metals
Types of Primers
Blast Primers
Metallic Zinc Primers
Red Oxide/Zinc Chrome Primers
Lead Based Primer
Wash Primer
Primers for wood
Leadless Primers:
Aluminium Primer
Emulsion Primers
Wall Primers & Sealers

12. Major Defects Which Occurs in Paints, Varnishes and Lacquers 125-129
Alligatoring
Bleeding
Blistering
Blooming
Blushing
Brush Drag
Brush Marking
Chalking
Checking
Cissing
Cracking
Efflorescence
Fading
Floating
Flooding
Gas Checking
Loss of Gloss
Lifting
Leaching
Orange Pell
Pinholing
Sagging

13. Powder Coatings
Thermoplastic Coatings
PVC Coatings
Thermosetting Coating Powders
Epoxy Powder Coatings
Formulation of Powder Coatings
Fluidized bed Coating
Electrosatic Fluidized Bed Coatings
Electrostatic Spray Coating

14. Drying Oils: Their Origin, Manufacture and Properties
   General History
   Types of Drying Oils
   Manufacturing and Refining Methods
   Solvent Extraction
   The composition of Drying Oils
   Future Developments

15. Pigments-General Classification and Description
   Definition of Paint
   Purposes of Pigments in Paint
   Hiding Power of Paint
   Extender Pigments
   Pigment Manufacturing

16. White Hiding Pigment

17. Organic Toners and Mineral Pigments
   Color Blending
   Metallic Pigments
   Blacks
   Earth Colors
   Inorganic Blues
   Organic Blues
   Browns
   Greens
   Organic Greens
   Marron Pigment
   Oranges
   Reds
   Violets
   Yellows

18. Rosin and Rosin Derivatives
19. Alkyd Resin Technology
20. Miscellaneous Resins in Protective Coatings
   Petroleum Resins
   TTerpene Resins
   Coumarone-Indene Resins
   Maleic Resins
   Chlorinated Resins
21. Solvent-type Resins
Spar Varnish
Exterior Enamels
Gaulking Compounds
Asphalt and Coal-tar Paint
Wall Primer and Sealers
Wall finish Coats
Enamel Undercoaters
Enamel Finish Coats
Varnishes
Floor Paints and Enamels
Miscellaneous
29. Water and Emulsion Paints
30. Aminoplast Resins
Chemistry and Composition
Commercial Practice and Composition
Functional Use and Mechanism
Formulation
31. Phenolic Resins
32. Epoxy Resins
Physical and Chemical Characteristics of Epoxy Resins
Two-Package or Amine-Cured Epoxy Coatings
Epoxy Esters
High-Performance Baking Finishes
Other Types of Epoxy Coatings
33. Acrylic Resins
Types of Acrylic Resins
Properties of Acrylic Resins
Polymerization of Acrylic Monomers
Applications of Acrylic Polymers
Starting Formulations
34. Vinyl Resins for Coatings
Polymerization Methods
Vinyl Chloride Solution Resins
Vinyl Dispersion Resins
Polyvinyl Acetal Resins
Polyvinyl Acetate
35. Urethane Coatings
Raw Materials
Coating Vehicle Intermediates
Chemistry
Classification of Coatings
Drying Oil Modified Urethanes
Prepolymers
Blocked Isocyanates
Two-Package Urethane Coatings ASTM-4
Polyester/Polyisocyanate Two-Component Systems, ASTM-5
Comparision of Uretthane Coatings with Competitive Coatings
Improved Color Stability
Lower-Cost Urethanes
Conclusion

36. Oxygenated Solvents
Ester Solvents
Ketone Solvents
Glycol Ether Solvents
Alcohols
Other Solvents
Solvent Properties
Formulation of Solvents Systems

37. White Pigments
Opacity
The reactive white Pigments
The nonreactive white Pigments

38. Coloured Pigments
Chrome Yellows
Zince Yellows
Strontium Yellow
Nickel Titanate Yellow
Nickel Azo Yellow
Cadmium Yellow
Yellow Iron Oxide
Hansa Yellows
Benzidine Yellows
Vat Yellows
Chrome Orange
Molybdate Orange
Cadmium Orange
"Mercadium" Orange
Benzidine Orange
Dinitraniline Orange
VatDay Oranges
Chrome Greens
Chromium oxide
Hydrated Chromium Oxide
Copper Phthalocyanine Green
Organic Green Toners
Iron Blues
Copper Phthalocyanine blues
Ultramarine Blue
Organic Blue Toners
Indanthrone Blue
Carbazole Dioxazine Violet
Organic Violet Toner
Mineral Violet
Quinacridone Violet
Lithols
Para Reds
Toluidine Reds
Lithol Rubine
Chlorinated Para Red
Quinacridone Reds and Maroons
Red Iron Oxide
Cadmium Red and Maroons
"Mercadium" Reds and Maroons
Red Lead
Thioindigo Reds and Maroons
Arylide Maroons
Siennas, Ochers and Umbers
Carbon Blacks, Lamp blacks and Bone Blacks
Tinting Properties of Colored Pigments

39. Paint Formulation
   Art
   Science
   Raw Materials
   Manufacture
   Cost
   Performance
   Principles
   Pigments Volume Concentration
   Critical Pigment Volume Concentration
   Pigment
   Vehicle
   Solvents and Driers
   Formulation Example
   Computer

40. Pigment Dispersion
   Definition
   Method
   Equipment
   Mill Base Formulation
   Setting Up a Laboratory Formula
   Equipment setups and Limitations
   Tank Configuration
   Premixers
   Conclusions

41. Emulsion Paints
   Ingredients of An Emulsion Paint
   Emulsion Formation
   Stability of Emulsions
Sample Chapter:
Formulations

ENAMELS

Transparent Enamel
Melt 15 lbs. Of cent per pure Manila gum on fire. Then add 1 gallon superior quality of linseed oil heated to 400Â°C. Now remove it from fire and let is cool. To this cold mixture then add 3.5 gallons of terpentine oil. To every gallon of the above mixture add 8 lbs. Zinc oxide crystals of good quality well grinded in paper varnish. To prepare this varnish 2 lbs. of damar is dissolved in half gallon cold terpentine oil.

To prepare Enamels in Different Colours
Following are given the mixtures of different pigments to prepare enamels of different colours. Transparent enamels mentioned above should be used equally in all the following formulas :-

<table>

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes varies technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
