Textile industry is one of the few basic industries, which is characterised as a necessary component of human life. One may classify it as a more glamorous industry, but whatever it is, it provides with the basic requirement called clothes. Spinning is the process of converting cotton or manmade fibre into yarn to be used for weaving and knitting. Weaving is a method of textile production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric or cloth. Finishing refers to the processes that convert the woven or knitted cloth into a usable material. Printing is the process of applying colour to fabric in definite patterns or designs.

The textile industry occupies an important position in the total volume of merchandise trade across countries. Developing countries account for little over two-third of world exports in textiles and clothing. It is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly. The future for the textile industry looks promising, buoyed by both strong domestic consumption as well as export demand.

This book is based on the latest technology involved in textile industry, which describes the processes available at the spinning and fabric forming stages coupled with the complexities of the finishing and colouration processes to the production of wide ranges of products.

The major contents of the book are dyeing of textile materials, principles of spinning, process preparatory to spinning, principles of weaving, textile chemicals, yarn preparation, weaving and woven fabrics, knitting and knit fabrics, nonconventional fabrics, cellulosics, mixed fibers, printing compositions, printing processes, transfer dyes, transfer inks etc. It describes the manufacturing processes and photographs of plant & machinery with supplier's contact details.

It will be a standard reference book for professionals, entrepreneurs, textile mill owners, those studying and researching in this important area and others interested in the field of textile industry.

**Content:**
1. The Dyeing Of Textile Materials
   Mordants
   Assistants
   Dyestuffs
   Indigo
   The Ingrain Dyes
   Water Used in Dyeing
   Interdependence of Processes
   Processes Preliminary to Dyeing
   Wool Scouring
   “Boiling-off” Silk
   Cotton Bleaching
   Wool Dyeing Processes
   Dyeing of Loose Wool
   Slubbing (Silver)
   Yarn Dyeing
   Piece Dyeing
   “Woaded Colours”
   Blacks on Wool
   Dark Blues, Greens, and Browns on Wool
   Cotton Dyeing Processes
   Fast Blacks on Cotton
   Fast Colours on Cotton
   Basic Colours on Cotton
   Dyeing of Mercerized Cotton
   Union Dyeing Processes
   Silk Dyeing Processes
   The Dyeing of Artificial Silk
   Colour Matching
   Fastness Properties of Dyes

2. The Principles Of Spinning
   Long Fibre Spinning
   Short Fibre Spinning

3. Process Preparatory To Spinning
   Four Methods of Preparing Vegetable Fibres for Spinning
   Four Methods of Preparing Animal Fibres for Spinning
   Two Methods of Silk Preparation
   Typical Example of the Method of
   Preparing and Spinnig
   A Textile Material (China-grass or Ramie)
   Preparatory Machines
   The Cotton Gin
   The Washing or Scouring Machine
   The Dryer
   The Cotton Scutcher
The Flax Scutcher
The Backwasher
The Preparing Gill-box
The Carder
The Dresser
The Comb
The Drawing-box
The Cone Drawing-box.
The French Drawing-box

4. The Principles Of Weaving
   Group-unit Weaving
   Shedding
   Picking
   Beating-up
   Letting-off and Taking-up
   The Boxing Mechanism
   The Stop-rod and Loose-reed Mechanism
   The Weft-fork Mechanism
   The Warp-stop Mechanism
   The Spooling or Shuttling Mechanism

5. The Principles Of Designing And Colouring
   Materials
   Interlacing
   The Use of Point-paper
   Colour
   Figure Designing

6. The Principles Of Finishing
   Finishing Processes and Machines
   Mending, Knotting and Burling
   Scouring
   Milling
   Crabbing
   Steaming
   Dyeing
   Washing-off
   Drying
   Tentering
   Brushing and Raising
   Cropping or Cutting
   Singeing
   Pressing
   Calendering
   Schreincring
   Filling
   Conditioning
7. **Textile Chemicals**

Indian Demand
Demand for Bleaching Agents
Textile Bleach Formulation
Industry Trends and Success Factors
Outlook and Opportunities
Fluorescent Whitening Agent
Sector of Applications
Usage Pattern
Industry Trends and Success Factors
Outlook and Opportunity
Flame Retardants
Halogenated Compounds
Non Halogenated Compounds
Application
Sector of Applications
Bleaching Agents
Use of Various Bleaching Agents on
Textile Fibres
Hydrogen Peroxide
Sodium Hydrosulphite (Hydros)
Sodium Hypochlorite
Application and Formulations
Bleaching Assistants
Chelating Agents
Fatty Alcohol Ethoxylate
Carboxy Methyl Cellulose
Demand
Acrylates
Industry Trends and Success Factors
Pattern of Use and Formulation - Starch/
Modified-Starch
The Spin Finish Compositions for Polyester and Polya Ide Yarn
White Oil
Industry Trends and Success Factors
Warp Sizes
Sector of Applications for Sizing Agents
Filament Yarns
Staple or Spun Yarn
Starch/Modified Starch
Demand
Polyvinyl Alcohol
Operations Involved in the Use of the
Textile Chemicals
Classification of Textile Chemicals
Classification Based on Use Pattern
Group Classification
Yarn Lubricants
Spin Finishing Agent

8. Global Scenario For Textile Chemicals

Estimated Global Market for Textile Chemicals
Estimated Markets for Textile Chemicals in the Asia-pacific Region (2001)
Estimated Consumption of Textile Chemical in Different Regions
Categories of Textile Chemicals Value (In Millions of Dollars)
Us Market for Textile Chemicals
Industry Trends and Success Factors
Outlook and Opportunities
Oxalic Acid
Polyethylene Glycol
Applications in Textile Industry
Silicone Oil/ Silicone Emulsion
Indian Demand for Silicone Oil/ Emulsion in Textile Sector
Industry Trends and Successful Factor
Outlook and Opportunities
Emeu/Dmdheu
Industry Trends and Success Factors
Sulphur Black
Industry Trends and Outlook
Textile Enzymes
Cellulase/Amylase
Classification of Thickening Agent
Pigment Binders
Guar Gum
Sodium Alginate
Sodium/Zinc Formaldehyde Sulphoxylate
Styrene Butadiene Rubber - Lattices
Formaldehyde Based Resins
Industry Trends and Outlook
Indian Scenario
Consumption Pattern of Flame Retardent Printing Auxiliary

9. YARN PREPARATION

Introduction
Winding
Quill Winding
10. Weaving AND WOVEN FABRICS
   Introduction
   Woven Fabrics
   Plain Weave
   Rib Weaves
   Basket Weaves
   Twill Weaves
   Satin Weaves
   Drawing-In Draft, Chain and Reed Plans
   Cover Factor
   Other Terms Related to Single Fabrics
   Weaving
   Shedding
   Filling Insertion
   Beat-up
   Warp and Fabric Control
   The Weaving Cycle
   Woven Fabric Production
   Secondary Mechanisms (Motions) In A Power Loom
   Warp Stop Motions
   Filling Stop Motions
   Warp Protector Motion
   Selvage Motion
   Box Motion
   Automatic Filling Transfer
   Shuttleless Looms
   Introduction
   Rapier Looms
   Projectile (Gripper) Looms
   Fluid Jet Looms
   New Weaving Technologies - Multiple Shed Looms
   Filling Accumulation Systems
   Modification of the Salvege

11. Knitting AND KNIT FABRICS
   Introduction
   Knitting Elements
   Needles and Knitting Action
   Sinkers
   Weft Knitting
   Single Knitting
   Single Knit Fabrics
Double Knitting
Double Knit Fabrics
Purl Knit Fabrics
Knit, Tuck and Float Loops
Weft Knit Design
Stitch Notation
Weft Knit Fabrics
Weft Knitted Fabric Production
Warp Knitting
Introduction
Major Machine Classification
Knitting Elements
Warp Knitting Action
Comparison between Tricot and Raschel
Warp Knit Design
Point Paper Notation
Single Bar Fabric
Two Bar Fabrics
Warp Knit Fabric Production

12. NonconVENTIONAL FABRICS
Introduction
Nonwoven Systems and Fabrics
Chemically or Adhesively Bonded Fabrics
Mechanically Bonded Fabrics
Tufting
Flocking
Laminated and Bonded Fabrics
Wet Adhesive Bonding
Foam Flame Bonding

13. Synthetic Substrates
Anthraquinones
Diverse synthetic substrates
Monozao Dyestuffs
Water-Insoluble Monoazo Dyestuffs
Mixture of Monoazo Dyestuffs for Polyesters
Azo Containing Compounds
Water-Soluble Disazo Dyestuffs for Polyamides
Gold and Orange Prints on Polyamides
Azocoumarinic Dyes for Hydrophobia
Synthetics
Dyestuffs Tolerant to Temperature and pH Variations
Printing of Nickel-Containing Polyolefins
14. Natural And Synthetic Substrates

- Anthraquinones
- Polyfluoro Acid Anthraquinone Dyestuffs for Polyamides
- Fibre Reactive Anthraquinone Compounds
- Aminoan Thraquinone Reactive Disperse Dyes
- Azo Compounds
- Naphtheylene and Tetrahydronaphthylene- containing Azo Dyestuffs
- Monoazo Dyestuff Containing Fiber-Reactive Group
- Cold Water soluble Acid Dye Compositions
- Polyvalent Metal and Azo-Barbituric Acid Anionic and Cationic Dyes
- Fluid and Stable Dispersions of Anionic Dyes
- Heterocyclic Cationic Dyestuffs
- Water-soluble Quaternary Ammonium Phenylazo Cationic Dyes

15. Cellulosics

- Reactive Dyes
- Organic Dye with Phosphonic Acid Monofluoride
- Aminonaphthyl Azobenzene Vinyl Reactive Dyes
- Phthalocyanine Reactive Dyestuffs
- Water-Soluble Fiber-Reactive Dyestuffs
- Disperse Dyes
- Fixation with Aliphatic Alcohols, Amines, or Aminoalcohols
- Azo Dyes having Substituted 2, 6-Diaminopyre Coupling Component
- Acylating Cellulose Fibers

16. Mixed Fibers

- Polyester and Wool
- Tone-in-Tone Dyeing of Polyester-Wool Blend
- Cellulosics and Synthetic Polyamides
- Marked Reactive Dyestuff
- Swellable Cellulosics and Synthetics
- Ethoxylated Condensate of Monocarboxylic Acid and Hydroxyalkylamine
- Water-soluble Solvent and Swelling Agent
- Disazo Dyes Derived from Amino-pyrazole
17. PRINTING COMPOSITIONS
   Printing Pastes with Developing Dyes
   Improved Base Printing Process
   Formic Acid as Developing Medium for Azo Dyes
   Auxiliary Agents in Print Formulations
   Hydroxyalkyl Carboxyalkyl Cellulose Thickening Agent
   Sodium Cellulose Sulfate as Thickening and Acid Fixing Agent
   Additive for Pigmentary Printing Pastes
   Salts of Diaryl Ether Sulfonic Acids
   Carrier for Cationic Dyes
   Dye Carrier Comprising Phenyl Cyclohexane and Derivatives

18. PRINTING PROCESSES
   Fixation
   Fixation with Vapor of Organic Solvent
   Dyestuffs for Methylene Chloride Fixation Processes
   Improved Fixation of Reactive Dyes on Cellulose Fibers
   Continuous Dyeing and Printing of Piece Goods
   Printing Heavy Pile Fabrics with Powder Preparations
   Improved Alignment of Printed Patterns
   Uniform Heat-setting of Continuous Synthet Filament Groups
   Voluminous Substrate Rolled up with Foreamed Dye
   Continuous Printing Process by Direct Liquid Film Transfer Method for Printing and Flocking Simultaneously
   Sprayed Carriers for Continuous Print Fixation

19. TRANSFER DYES
   Anthraquinones
   Anthraquinone Ink Formulation
   Anthraquinone Dyes for Synthetics
Deep Yellow Colors on Polyesters
Indolenine Methines for Acid-modified Synthetics
Heterocyclic Naphthalene Derivatives
Printing Polyacrylonitriles with Disperse Dyes
Disperse Dyes Containing Carboxylic Acid Groups
Hydrolyzable Silyl-substituted Dyestuffs
Nitroacridone Dyestuffs
Heat Transfer Black Dyestuff A
Heat Transfer Black Dyestuff B
Dyestuff Combinations for Long-Pile Fabrics

20. TRANSFER INKS
   Organic Base
   Cationic Dyes in Organic Solvents
   Carbinol Base of Cationic Dyestuff as Dyestuff Intermediate
   These Inks are characterized in that they contain at Least Sublimable Dyestuff Base on Acid-Modified Fibres
   Aqueous and Oil in Water
   Aqueous Preparations of Sparingly Soluble Dyestuffs
   Organic-aqueous Printing Inks
   Water-dilutable Transfer Ink Compositions
   Dry Preparation
   Hot-Melt and Hot-Stamp Inks
   Hot-Melt Ink Composition
   N-Methoxymethylated Nylon Copolymer for Hot-Stamp Ink
   Production of Transfer Paper by Rotary Screen Printing
   Transfer Inks for Household Use
   Inks of High Filler Content
   UV-curable Inks For Offset-printing Transfers

21. PHOTOGRAPHS OF PLANT & MACHINERY WITH SUPPLIER’S CONTACT DETAILS

Sample Chapter:
NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are:
Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES
106-E, Kamla Nagar, New Delhi-110007, India.
