Automatic Fan Belts

Capacity:	200 Kgs/Day
Plant and machinery cost:	14.00 Lakh
Working Capital:	14.00 Lakh
Rate of return(ROR):	45.43 %
Break Even Point (BEP):	54.42 %
TCI:	45.00 Lakh
Cost of Project:	45.00 Lakh

India is one of the leading countries for rubber products. Fan belts are essentially used in automobile sector to transmit the power from one pulley to another pulley. The belt which transmits power is called power transmission belt. The production of fan belts started in India since long back. It is being produced in large and small scale sector both. At present, there are about 16 units in the organized sector and many units in the small-scale sector manufacturing fan belts in India. The production has increased continuously during last decades growth rate of 10.29 percent per annum. The demand for fan belt in future will increase with the increase in the growth of their main endues segment i.e. industrial sector and automobile industry. The industry sector is growing at a quite good rate. So there is good scope for new investment in this industry. You can come in this field.

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.
