Most metals are found in nature in combined from other elements such as Oxygen, Sulfur etc. by adding energy during the processing of these metallic ores, the metal is raised from the nature state to the more metallic state. In this condition, the metal however prefer to return to the more stable form in which it was found in nature, such as an Oxide, Sulfide, etc. this process is called corrosion. Before choosing the exact coating system for a particular metal surface. The particular alloy must be identified. The corrosion rate of the metal can be reduced by both the pigments and the binder portion of a paint film. If however, you do not wish to destroy the aesthetic effect of the base metal it self a clear coating can be used. It is generally accepted that a coating is only as good as its associated surface preparation for ultimate performance of a coating. The surface should be in the optimum condition dictated by the coating to be applied. In India average rate of growth is 6% per annum. About 10% of the products is imported in India and more than 15% of our production is exported. According to the growth of construction industries in India is about 6.8% per annum & Internationally also construction industries which is more than 6% per annum, it can be concluded that growth rate should remain 6% in coming year.
NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes varies technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureau, consultants and consultancy firms as one of the input in their research.
