Dextrin is a starch derivative. It is obtained as water-soluble carbohydrate produced by heat and acid depolymerization. It is mostly used in adhesive industry. Dextrin is used in adhesive application. These are used for envelope and labeling adhesives, adhesive for postage-stamp, gummed tape etc. Dextrin manufacture has very good scope for development in the small scale sector and especially in developing and agriculture based country like India. At present dextrin is running in short supply in the market. There is good scope for new investment in this project. The new entrepreneur can well venture in this field.
