Albumin's are water soluble proteins which are found in both plant & animal tissues.

Legumelin in leumes and leucosia in various cereals are examples of plant albumin's whereas oval bomin, serum albumin etc. are the example of animal albumin. Bovine serum albumin is separated by dialysis.

There is necessary to apply lyophilized process for manufacturing and separation of bovine albumin. There is necessity to take proper precautions and aseptic condition during commercial manufacturing process.

Though the indigenous technology is available in India, but there is necessary to import plant and machineries. It has good market demand which is increasing day by day. It can be used mainly for the exchange of blood plasma in medical science. As a whole this project is good one for new comers.
