A fibrous protein comprising most of the white fibre in the connective tissue of animals and man, especially in the skin muscles and tendons. The most abundant proline is the animal kingdom, it is rich in proline and hydroxyproline collagen is found in connective tissue and also in bones. Connective tissue is widely distributed throughout the body in such structures as the dermis, tendons, ligaments, cartilage and the matrix of bone. Surgical suture or biomedical textile is prepared from the fish collagen. There are different fish available in India in abundance. Raw materials to process fish skin are also available but expertise is not easily available. Protein and fat wastes are generated which can be utilized to manufacture protein extract and fish oil. Biodegradable waste can be used for fish or poultry feed. Market is very good for quality products.
