Silicone Release Paper makes a big impact in a lot of little ways throughout our daily lives. From the bandage paper we peel away after a nasty paper-cut to the backing of every postage stamp we place, silicone release paper keeps fresh and tacky a wide variety of adhesives. While normal paper bonds to adhesives, release paper is designed specifically to be easy to pull away, without the risk of it falling off on its own.

Global silicone release paper market is expected to expand at a lucrative CAGR during the forecast period, due to rising demand from application segments such as tapes, labels and other sealant product industries. Expected growth in end use sectors: construction, food & beverages, automotive & electronics over forecast period is anticipated to drive the silicone release papers market worldwide.
