Fruits and vegetables are preserved for a long time by reducing its moisture content. There are various ways of reducing the various moisture content, but here we have discussed osmo dehydration process, which is more economic and beneficial to processors. This technology is not well established in India. There is very good domestic and export market for the dehydrated fruits and vegetables. Dehydrated fruits and vegetables had good export market in Middle East, Russia and part of European countries. As a whole there is a good prospects for new entrepreneurs who want to venture into this field.
