Disposable Syringes are being used by doctors to inject medicines through intravenous or intramuscular ways for the treatment of diseases & also by research & development personnel. Disposable syringes are made of plastic material and are used in the field of medical and veterinary science. The manufacture of plastic syringes has been developed to such a degree that the products now satisfy the requirements and standards set by Hospital and physicians.

Disposable syringes are the dominating market with a CAGR of around 6% over the forecast period i.e. 2016-2024 because disposable syringes are used only once ensuring the safety of patients. On the basis of material, glass syringe is dominating the segment and is expected to reach a value of USD 15 million by 2024 because they can be sterilized and reused. The syringes market is expected to reach USD 15.99 Billion by 2021 from USD 10.56 Billion in 2016, at a CAGR of 8.7% during the forecast period. Thus, due to demand it is best to invest in this project.
