## Baby Cereal Food

<b>Capacity:</b>	5.00 Tons/Day
<b>Plant and machinery cost:</b>	23.00 Lakh
<b>Working Capital:</b>	0.00 Lakh
<b>Rate of return(ROR):</b>	48.00 %
<b>Break Even Point (BEP):</b>	32.00 %
<b>TCI:</b>	316.00 Lakh
<b>Cost of Project:</b>	316.00 Lakh

Food is mainly composed of three main groups of constituents i.e., carbohydrates, Fat & Protein. The baby cereal food is that enriched food which has a requisite level of nutrition. This requisite level is prescribed by various dieticians & physicians for children. Food products are derived from single grains or blends of mixed grains combined with other ingredients for flavour and nutritional fortification. Materials used by various manufacturers in addition to the grains include melt, milk powder, vegetable oil, wheat germ, sugar, cotton seed flour, dried yeast, a form of iron such as sodium pyrophosphate and B vitamin thiamin. One of the purposes of adding solid food to the baby's diet is to acquaint him with foods of a different consistency, texture and taste than those of liquids. Demand of cereal food in India is increasing about 8%. There is good scope for new investment in this field. Any entrepreneur can invest in this project.

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.
