Selenium is a non-metallic element. Its name was derived from selene (moon, in Greek). The element has been found in cavities of vesuvian lavas and in some shales. Selenium coated aluminium drum is the main and valuable part of the PPC that is advised to the purchaser before placing an order for a machine to find out the cost of replacement of the selenium drum and annual servicing contract charges. Decorative coatings are widely in the automotive home appliances, hardware, costume jewelry and novelty fields. Functional coatings have numerous applications such as reflection, anti reflection, filter and beam splitter coatings on optical instrument current carrying dielectric and semi-conductor coatings on electronic components, hot corrosion resistant coatings on air craft and missile parts, and oxidation resistant coatings for gas turbine blades and vanes. Plain paper copier provides an alternative for producing almost scope for new investment.
