Natural barium carbonate was formerly mined commercially in England. Precipitated barium carbonate is the most widely used barium chemicals with the exception of natural barite. It is used in the bricks, ceramic, oil well drilling, photography, glass and chemical industries. The greatest tonnage of barium carbonate is used in bricks industry. To cater the outgrowing demand of this product, it is very imperative that many more units must be established. Thus a new entrepreneur can confidently venture in to the production of barium carbonate.
