Conduit pipe is a product through which electric wiring is passed in order to keep it safe. It is manufactured from hot rolled or cold rolled sheets. It is used in cycle industry and for lower end applications such as plumbing, in irrigation projects and low fluid pressure applications. Most of the manufacturing these pipes are situated in northern markets like Tisco, Rajinder Pipes etc. Thus the players who have or likely to set up units in the west and south will have an advantage in terms of lower capacities and freight cost.
