The powder of potato is known for sustaining millions of lives by providing food and nutrition during distress times. Its great taste makes potato one of the most important food crops in the world. In India, potatoes are grown in winter under short-day conditions potato powder flakes and pellets are processed potato. It will help to increase the shelf life of potatoes. It is used for making allu bhujia, to make soup concentrate and also used as breakfast or snack food. Potato is a perishable commodity, it needs to be stored at proper temperature. Approximately 10% of potato production is used as seed. Approximately 20% of produce is wasted due to transport and inadequate storage. Thus, total production 70% is consumed as fresh or processed. Processed potatoes includes chips, fries, powders, meals etc. in certain households still most of the production of potatoes is consumed as fresh. There is a good scope for new entrants.
