Contract farming is most commonly practiced by food processing firms. These firms have an interest in keeping raw material inflows at a stable level, close to plant capacity. Contract farming is becoming an increasingly important aspect of agribusiness, whether the products are purchased by multinationals, smaller companies, government agencies, farmer co-operatives or individual entrepreneurs. Use of biotechnology in horticulture, sericulture, floriculture and in the production of other agriculture products may prove to be a that in the arm of our endeavor to bring growth in the agriculture. Such an opportunity brightens up in the wake of globalization of Indian agriculture the one hand and through the adoption of contract farming on the other. Contract farming is defined as a system for the production and supply of agricultural/horticultural produce under forward contracts between producers/ suppliers and buyer. Pre agreed price, quality, quantity or acreage (minimum/maximum) and time.
