CHARCOAL POWDER FROM RICE HUSK

Capacity:	50 MT/day
Plant and machinery cost:	190.00 Lakh
Working Capital:	0.00 Lakh
Rate of return(ROR):	53.00 %
Break Even Point (BEP):	33.00 %
TCI:	845.00 Lakh
Cost of Project:	845.00 Lakh

Charcoal is produced in kilns and retorts. The thermal decomposition of wood in a kiln with a controlled air supply produces charcoal. The gaseous products and some of the wood are burned. Retort charcoal is generated in the absence of air. Originally, charcoal was used as a smokeless, odorless fuel for heating and cooking and it is still used today for these purposes by people in well-wooded underdeveloped countries. Charcoal granules are used as a food additive for domestic animals. It is used for the production of black powder. It is also used in foundries as well as for de-scaling of metal sheets and wires. There is a good scope for new entrants.

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directory, databases, detailed project reports, market survey reports on various industries and profit making business.
