Water quality and quantity are interdependent, interacting elements of water system. The term water quality refers to the level of suitability of water for specified purposes. Use of mineral water gradually increase in India due so shortage of pure hygienic water and also increase the knowledge of water because pathogenic micro organisms, which are main reason of stomach problem. On this reason a part of the society stored so use safe drinking water i.e. mineral water. There is increase full life, major of the working group has to take travel from one place to another place, by this time they are now habituate to use mineral water. Major of the tourists are only habituated to take safe drinking waters. Packed bottled mineral water is the only main resources in our country to safe drinking water. On that base, it can be concluded that scope of mineral water will be much more increased in the future.
