Thermocole or expanded polystyrene as the name suggests, is polystyrene expanded to more than two times the volume of polystyrene. Polystyrene foam is an excellent packaging material because of combination of various properties such as lightness, rigidity, shock absorption thermal insulation, resistance to moisture etc. It can be moulded to any desired shape with designs and trade name embossed. Expanded polystyrene is one of such foams. It has many uses such as thermal insulation material, acoustic treatments shock protective packaging etc. The end use of thermocole is very much interesting, because it is mostly used in packaging. Due to the increase of electronic industries, pharmaceutical industries, the demand of thermocole is also increasing. So the unit has very good scope.
