Adhesives are advantageous over other methods of joining materials. Thin films, fibers and small particles that cannot be combined satisfactorily by other techniques are readily bonded by adhesives. The adhesive composition used for treating a large quantity of fabric materials is preferably non inflammable and non-poisonous. Adhesives are used for bonding of surfaces, where the mechanical bonding methods results in distortion, discoloration, corrosion and other limitation. It is used to reduce cost and performance improvement. It may be used for bonding of dissimilar materials such as combination of metals, rubbers, plastics, foamed materials, fabrics, wood etc. Any entrepreneur may go into the process, will be successful in this project.
