Soyabean after processing by heat treatment or germination is consumed in the form of flour, milk, curd, other fermented products and soyabean nuggets. It is a protein enriched, ready-to-eat food made from defatted ground nut/soy flour and cereal/gram flour. It can be made on a small or tiny scale basis.

Soyabean nuggets are becoming increasingly popular due to its high nutritive value and protein content. It is used in household, hotels and restaurants, lodging and boarding places, guest house, community places, hostels and cafeterias, airports etc. India exports tonnes of soyabean extract to China and the deoiled cake, a cattle feed, is exported to Far east . The soyabean processing industry is a lucrative industry with many units all over India. New entrepreneurs can invest in this industry as it has tremendous export potential and domestic demand too.
