Mixed fertilizer is a mixture of balance bio-fertilizer and balance in organic fertilizer like DAP and potassium nitrate. There are varieties of use of mixed fertilizer. There are many private organizers and few organized manufacturers are available in India, who are manufacturing different variety of fertilizer. Demand of mixed fertilizer gradually increases due to increase of organic farming. It is mixed with balanced minerals, which is required for the plant growth. It has no bad effect on the soil after use in future. It is mostly neutral in nature. On the global scene, the Indian fertilizer industry has a predominant presence. India accounts for 50% of the world import of this input. Over the years, the Indian industry has shown significant improvement in performance levels. It can claim to be one of the most efficient in the world. There is a great scope to invest into this project.
