Cost of Project:	29.00 Lakh

Poultry industry has made tremendous progress through improvement in genetics, management and nutrition, for obtaining maximum growth in broilers and egg production in layers. In case of broiler the nutrients are utilized for the maintenance of body and also to obtain maximum growth through proper digestion, absorption and assimilation of nutrients. In poultry farm broilers and layers are grown up, which are used for meat purpose and layers for production of egg purpose. The poultry industry supplies a considerable proportion of the world's protein requirements. It has undergone tremendous growth during the past two decades in many parts of the world. In all ways more is known about the nutrition of the broiler chicken than any other type of chicken. In the race for rapid growth and top feed conversion scientists have spent countless number of years developing feed formulae that will eventually give rapid and economical gains in the broiler house. A new entrepreneur can confidently venture into this field.
