Rock wool is mostly silicate compound of calcium and very smaller amount of copper, iron & manganese. It is fundamental form of solid characterized by relatively high tenacity and extremely high ratio of length to diameter. Inorganic material made into matted fibre, especially used for insulation and sound proofing material. It can be used for high temperature insulation of kilns and furnaces, in packing expansion joints etc. There is demand of Rock Wool in our country of about more than 1500 MT per annum according to our market study. It can increase due to high demand of electrical energy. Machinery demand is increasing at the rate of 2% per annum. On that basis we can predict that in future demand of rock wool will increase by 2% per annum from the present demand. It can be predicted that there is fair scope for new entrepreneurs.
