Alcohol is used directly in the manufacture of several compounds such as ethyl acetate and other esters, acetic acid, acetone, chloral, chloroform. It is used in the manufacture of TNT and transparent soaps also. In India there are about 89 units engaged in the production of ethyl alcohol with an installed capacity of 5.34 lakhs kilolitres per annum. But the production is considerably lower than the demand. There are 3 or 4 is organized sectors engaged in the manufacturing of absolute alcohol out of more than two hundred distilleries. Mostly distilleries are engaged in the selling of rectified spirit or country spirit or they are engaged in the manufacturing of I.M.F.L. It is estimated that the demand of absolute alcohol will be 31,250 K.L. in 2010. Any new entrepreneur may enter in this field, will be successful.
