Salt is a basic food element of all human beings. Due to its widespread use all over the world and also due to the increasing demand for refined, iodized and super quality salts, this industry provides very big scope for new investment in salt cultivation. It is produced either from saline water or mined from rock, the largest source of saline water being the sea. Due to long coastal lines of the country, salt lakes and salt springs, it is quite popular for salt cultivators. With rising industrial demand in bulk quantities, bulk production has started. Of the total salt produced, 29.91% is produced by large salt works while 76.09 % by salt farms. Household sector claim 47% of salt produced while industry sector claims 53% of share. Iodized salt is increasing in demand with quality-consciousness among users. There is good prospect for entrepreneurs in this field.
