Matchbox is one of the most important items. Though it is looked upon as small and insignificant, earlier it was a big problem. In the 17th century, people used phosphorous and sulfur together using flints or sticks of woods. It was then found in the 19th century that using non-provisions red phosphorous on the match head instead of white phosphorus. The raw materials required for the manufacture of matches are timber paper, flour paste or glue, and chemicals of which amorphous phosphorus and potassium chlorate are the most important. Due to the widespread use of cigar, bidi, Cigarettes and domestic uses, there are huge demand of match boxes. A new entrepreneur can well venture into this field,because it has good future scope.
