Cost of Project:	280.00 Lakh

Food is mainly composed of three main groups of constituents i.e. carbohydrates, fat & protein. In addition to this there must be some inorganic minerals & organic substances e.g. vitamins, Iron, Mg etc. The body cereal foods is that enriched food which has a requisite level of nutrition. This requisite level is prescribed by various dieticians and physicians for children. Various experts fixed a definite calorific value for infant food and based on this the various mixtures or formulae of food are developed. These formulae of infant food contains essential amino-acids, fats, proteins, vitamins & other essential mineral etc. which is necessary for the normal growth of child. The new entrepreneur may enter in this field with conscious about quality and better market strategy since there is competition over the food production. It can be full filled by new entrepreneur.
