Activated carbon is a form of carbon that shows high absorptivity for gases, vapour and colloidal solids in either gaseous or liquid phase. It is available in many forms such as pellets, granules and powder. Activated carbon is very important and widely used chemical having application in industries that require absorption of gases and vapours for purification in catalytic chemical reactions, decolorisation of veg. oil and sugar solution. Activated carbons have a large surface area. Liquid phase activated carbons are light in weight, fluffy powder, while gas phase activated carbons are hard and are in the form of pellets. At present the demand is growing very fast and the scope for the product is very good.
