Capacity:	5.0 MT/Day
Plant and machinery cost:	8.00 Lakh
Working Capital:	10.00 Lakh
Rate of return(ROR):	48.19 %
Break Even Point (BEP):	42.53 %
TCI:	55.00 Lakh
Cost of Project:	55.00 Lakh

Vermicompost is a newly developed compost fertilizer which can be used largely instead of inorganic as well as organic fertilizer. The production of vermicompost involves breeding of earth worms in a mixture of cow dung, soil and agriculture residue till the whole mass is converted into cast. This cast is then collected to give the vermicompost. With an eye to all benefits, increasing attention is being focused on breeding of earth worm (vermiculture) and their subsequent use in preparation of manure called Vermicompost. There are few organized sectors and few state government as well as central government, some of private organization also manufactured vermicompost. There is requirement of good advertisement and consciousness towards farmers to the good effect over the existing fertilizer to make popularity of the vermicompost. The demand will be double or triple in near future. There is good scope for new entrepreneurs.

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry.
